Please see next page for multiple business dues investment.

## Multiple Business Dues Investment Schedule – 2017

This schedule pertains to those businesses that have two or more types of businesses on their premises (as indicated by the types on page one,) with the SAME EMPLOYER I.D. NUMBER. If the businesses have different employer I.D. numbers, but are owned by the same people, they need to join the chamber as separate businesses.

How to calculate multiple investment dues:

1. Decide which of your businesses is the PRIMARY business and find your dues investment on page one. Please make sure to add all the appropriate employee numbers in with your primary dues.
2. Based on this investment, your additional investment(s) is/are as follows:

Your primary business dues are \$437 or below,  
your additional business(es) = \$172 (each)

If it is \$438 - \$530, your additional business(es) = \$272 (each)

If it is \$531 - \$659 = \$402

If it is \$660 - \$810 = \$455

If it is \$811 - \$972 = \$582

If it is \$973 - \$1266 = \$848

If it is \$1267+ = \$1,060
