Flood Protection Advocates,

Since Natomas property owners supported a new flood safety assessment by almost 85%, activists have focused on educating the members of the U.S. Congress about the need to authorize the Army Corps of Engineers to undertake their portion of the project.

Unfortunately these are turbulent times in Washington, D.C. and there are a lot of competing projects worthy of attention. Californians for Sacramento Flood Safety and Water Supply Reliability is working to make sure Congress hears our concerns about protecting our communities from floods.

As we begin to build our list of California supporters we ask that you assist in sending a strong flood security message to our elected officials both as an individual and by soliciting the endorsement of the organizations you work in and with. There are three ways that you can help build this effort to make sure that we keep improving the levee system in Natomas, Sacramento, and throughout the Central Valley.

1. **Send an Endorsement Letter.** A model letter that can be adapted for individuals or organizations is attached. Please send a personal endorsement to the coalition today so that our federal officials get the clear message that the time to act for flood safety is now. Once you have mailed the personal endorsement please ask your community organization, business or neighborhood association, government agency, or any other civic organization to also send an endorsement letter. Let us know when you have endorsed at sarah@kennedymodeste.com.
2. **Join Us on Facebook.** We post regular updates on flood control issues on our Facebook page at <https://www.facebook.com/CaliforniaFloodSafety>. By joining this group you will have access to the latest information, as well as sending a strong message that flood safety is a vital issue to Californians.
3. **Send us Recommendations on Other Activists.** Please feel free to circulate all our materials through your networks and to reach out to others in your community. But it also would be helpful if you send us contact information for other individuals and organizations that should be part of this effort. Please forward your recommendations and copies of endorsement letters to outreach coordinator Sarah Modeste at sarah@kennedymodeste.com. You can also call the Californians for Flood Safety and Water Supply Reliability hotline at 916.550.8349.

Thank you for your continued support of flood security.

Dennis Rogers
