

CT Protective Measures in the Workplace - Masks

Good morning,

Following the announcement last Monday that made masks or cloth face coverings mandatory in the workplace we received a number of inquiries about the availability of disposable masks. The TEAM at Resource Development Associates made introductions directly to A Custom Style LLC, a supplier we have worked with in the past, and helped to assure nearly 60,000 disposable masks were delivered to CT manufactures and businesses.

This weekend that supplier advised us that although more masks are expected to be inventoried in the coming weeks, their domestic supply designated for CT is down to 75,000 masks. Based on requests we expect that supply may be exhausted this week and as such we are suggesting if you need masks now or anticipate a need in the next ten days, consider placing your order with a proven supplier.

As you might imagine, demand for disposable masks is high. Employers calling RDA have shared concerns over extended delivery, authenticity of supply, quality of masks and the ability to source at all. If you need assistance, see the information below.

We hope this information is helpful. Stay well, stay productive and look to better days we will have ahead and please, never hesitate to ask the questions you have of us...

Sincerely,

Rich DuPont
President
Resource Development Associates
