

# COVID-19 Business Recovery Guidance

---

Published April 28, 2020

In order to operate safely, businesses need to consider many important health and safety factors **before reopening**. This may mean changing operating procedures, if necessary, to protect both employees and customers.

## Symptom Monitoring

- Employees must perform daily symptom assessment
  - Daily symptom assessments should include taking your temperature with a thermometer and monitoring for fever. Also watch for coughing or trouble breathing.
- Could take temperature of each employee as they enter
- Consider a mechanism to have the staff document that they are symptom free (online check-in)

## Policies

- Require employees to stay home if symptomatic (consider paid sick leave)
- Stagger or limit arrivals of employees and guests
- Strongly recommend the use of face coverings at all times while at work
- Consider liberal leave policies for employees who become sick
- Consider special accommodations for vulnerable employees, such as working from home

## Social Distancing

- Continue to practice social distancing standard of staying 6 feet apart
- Return to work in phases, if possible – re-establish services in order of essential need
- Implement telecommuting practices by allowing staff whose jobs can be performed remotely to work from home
- Consider rotating work schedules to limit number of staff in the office at once
- Continue to avoid face-to-face meetings of 10 or more people
- Install plexiglass or barriers between employees and the public
- Consider reducing maximum occupancy limits
- Discourage staff from convening together at lunch or break times
- Consider closing common areas where people are likely to congregate

## Sanitization

- Need to be able to procure hand sanitizer, soap, personal protective equipment (PPE) and disinfectant
- Provide hand sanitizer at entry
- Provide places to wash hands
- Provide employees with proper PPE as needed
- Disinfect frequently used items and/or surfaces
- Place paper towels in the restrooms as opposed to air dryers
- Conduct additional cleaning of high-touch areas

## Travel

- Minimize non-essential travel
- Adhere to Centers for Disease Control and Prevention (CDC) guidelines regarding isolation following travel: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

Information contained in these guidelines was pulled from the CDC website <https://www.cdc.gov/coronavirus/2019-ncov/community/organizations/businesses-employers.html>. Guidelines are subject to change as the state and federal information changes.
