COVID-19 and Antibody Testing Partnerships at First Care Urgent Care

First Care is now offering antibody testing, in addition to their COVID-19 Diagnostic testing, at no-cost to insured* or uninsured patients.

First Care Urgent Care is working with local businesses at all 18 of their locations to help to return employees to work sooner and safer from the COVID-19 pandemic. They are able to provide a unique partnership for COVID-19 and antibody testing at no-cost to the patient or organization. If your business is interested in this partnership, please contact ocmed@firstcareclinics.com.

First Care accepts Medicare, Medicaid, and most insurance plans. Most plans have waived copays, so First Care will not collect anything from insured patients getting tested. If patients are uninsured, First Care will enroll these individuals in the HRSA Uninsured Program for full coverage of their visit.

“We are working with a CLIA-accredited lab to get results for both COVID-19 diagnostic testing and antibody testing results back within 72 hours”, Rob Pantoja, CEO said, “We have been working very hard to get these testing resources to our communities and also make it convenient and hassle-free for our patients.”

Each location offers no-appointment-necessary visits with licensed providers for treatment of minor illnesses and injuries. First Care Urgent Care utilizes stringent sanitation and infection control procedures while also following CDC Infection Control guidelines in their cleaning regimens. For more information, please visit firstcareclinics.com.

*For a limited time, COVID-19 testing and related office visits are currently free to patients under most insurance plans.
