## Canadian Chamber of Commerce Policy Win

### Our Success = Your Gain

The Canadian Chamber of Commerce exists to ensure Canadian businesses have access to the people, customers, infrastructure, capital and technology needed to compete and win in domestic and global markets.

They are proud that we were able to influence the government to implement public policy improvements or commit financing to the benefit of Canadian business.

These wins will enable businesses to create jobs for Canadians, expand their markets, increase their productivity and generate the wealth needed to support the families, schools and social programs in their communities.
