

Starting April 1, 2018: Rebates and services for refrigeration upgrades can help your small and medium-sized business customers save money

Our Minnesota Commercial Refrigeration Efficiency program can offer your customers a convenient way to identify energy-saving opportunities and earn rebates for refrigeration upgrades.

Savings: Rebates are available for most the common types of upgrades, including:

- Anti-sweat heater controls
- Demand control ventilation
- Electronically commutated motors
- Evaporator fan motor controllers
- LED reach-in case lighting
- New medium temperature reach in case with doors
- No heat case doors
- Retrofit of open multi-deck cases with doors

(See more details on back)

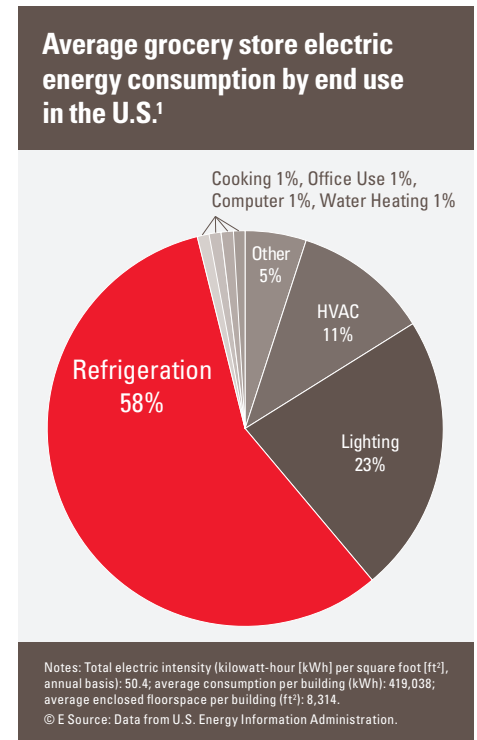

Plus, other types of high-efficiency equipment may qualify for rebates through our Custom Efficiency program.

No paperwork: After equipment upgrades are installed, a program representative will fill out and submit all of the customer’s rebate applications. They’ll also submit any preapproval forms for any equipment which could qualify for our custom rebates.

Free services: In addition to rebates, we offer technical assistance to help your customers find ways to save energy and money. We also provide administrative support to secure and process optimum rebates and can help facilitate the proposal process.

Types of businesses that can benefit:

- Convenience stores
- Grocery stores
- Liquor stores
- Restaurants
- Retail stores with food service
- Schools

¹E Source: Supermarkets and Grocery Stores, Sector Snapshot. May 21, 2013.

Energy-Saving Upgrade	Rebate
Anti-sweat heater controls	\$60/door
Demand control ventilation— Commercial kitchen ventilation hoods with demand controlled capability.	Gas customers: \$250 per exhaust fan hp Electric customers: \$400 lump-sum for all fans under 5hp \$125 per exhaust fan hp for fans equal to or greater than 5hp but less than 7.5hp \$100 per exhaust fan hp for fans 7.5hp and greater
Electronically commutated motors	\$40/motor display case \$70/motor walk-in
Evaporator fan motor controllers	\$35/motor controlled
