

Child Care COVID Response & Preparedness Plan

Program Information

Child care program name:

Kidzone

Introduction

Our Commitment to Health & Safety

Kidzone is committed to protecting the health of our children, families, staff, and community. The following policies were designed in response to guidance from the Michigan Departments of Licensing and Regulatory Affairs (LARA) and Health and Human Services, in accordance with best practices from the Centers for Disease Control and Prevention, and with everyone's well-being in mind. To limit the potential spread of COVID-19, we will be making some temporary changes to our programming that include robust cleaning and disinfecting procedures and minimizing opportunities for person-to-person exposure (e.g., an infected person spreading respiratory droplets through actions such as coughing, sneezing, or talking). The following plan outlines the recommended practices and strategies we will use to protect the health of our children, staff, and families while at the same time ensuring that children are experiencing developmentally appropriate and responsive interactions and environments.

Changes to Our Physical Spaces

We will use the following strategies in our classrooms and facilities to minimize the spread of illness:

1. Rearranging classroom areas to seat children as far apart as reasonably possible and limiting the number of children sitting together.
2. Using touchless trash cans to provide a hands-free way to dispose of tissues and contaminants.
3. Ensuring ventilation systems operate properly and increasing circulation of outdoor air as much as possible (e.g., keeping windows and doors open to the extent that this does not pose safety risks).
4. Before re-opening we will ensure all water systems and drinking fountains are safe following CDC guidelines.
5. Where possible, dividing large group spaces to allow more children to safely use the space (e.g., using child-sized furniture, such as rolling shelves and kitchenettes, to divide a room and prevent mixing between groups of children).

Availability of Toys and Classroom Materials

At this time, we will make the following changes to the toys and materials in our classrooms:

1. We will remove toys and objects which cannot be easily cleaned or sanitized between use.
2. Given that cloth toys are not recommended at this time, we will remove these from classrooms.
3. Cloth toys will be used by one individual at a time and laundered before being used by another child.
4. We will temporarily suspend use of water and sensory tables.
5. Toys will be washed and sanitized before being moved from one group of children to another.

Mealtimes

To limit opportunities for exposure during mealtimes, we will engage in the following recommended practices:

1. We will space seating as far apart as possible (ideally 6 feet apart) by limiting the number of children sitting together and rearranging seating.
2. Staff and children will wash hands before and immediately after children have eaten.

Naptime

To reduce potential for viral spread, we will engage in the following recommended practices:

1. Bedding that touches a child's skin will be cleaned weekly or before use by another child.
2. Storing each child's bedding in individually labeled bins, cubbies, or bags.
3. Ensuring that children's naptime mats/cots/cribs are spaced out as much as possible, ideally 6 feet apart.
4. When possible, children will be placed head-to-toe (i.e., one child with their head at the top of the mat, the next child over with their head at the bottom of the mat).
5. Using bedding (sheets, pillows, blankets, sleeping bags) that can be washed.

Items Brought From Home

During this time, we are trying to limit the number of items brought into the facility because this can be a way to transmit the virus, so we ask that families refrain from bringing items from home as much as possible. However, we recognize that placing limits on children's comfort items may increase stress for children and staff as they may be especially needed during this time of transition.

We ask that families and staff follow these guidelines with regard to children's comfort items:

1. To avoid these items coming into contact with many children, efforts will be made for these items to be placed in a cubby or bin and be used at naptime or as needed.
2. Items should be washed weekly (at our facility or the child's home) and daily if the comfort item is a soft material (e.g., blanket, stuffed animal, clothing).
3. If possible, comfort items should remain at the child care facility to avoid cross-contamination.

Screening Families & Staff for COVID-19 Symptoms and Exposure

Upon arrival to the program, staff and families are required to report if they or anyone in their household:

**have received positive COVID-19 results;
been in close contact with someone who has COVID-19; and/or
have experienced symptoms such as persistent cough, fever, difficulty breathing, chills,
change in smell or taste, diarrhea, and/or vomiting.**

The procedures we will use to screen staff for symptoms and exposure include:

Kidzone staff will use the LMC Health Checker this site is optimal on any mobile device. Kidzone staff can routinely check for symptoms before they come to work each day. Staff will complete the questions and will either receive a green good-to-go check mark or be directed to seek further medical advice.

<https://www.lakemichigancollege.edu/about/safety-and-emergency/-covid-19/symptom-checker>

The procedures we will use to screen children/families for symptoms and exposure include:

Kidzone staff will be present each morning to screen by asking questions regarding symptoms and exposure. Kidzone will write down and keep a log of each child's screening. If a child is experiencing symptoms or has had exposure to someone that has COVID-19 then the family is asked to return home and quarantine and not return to the center until fever/symptom free for 72 hours. If your child is experiencing vomiting and diarrhea you must not return until 48 hours symptom free.

If families or staff are absent or otherwise off-site but experience exposure or symptoms, they should contact:

Kidzone staff or child is absent for the day and experience exposure or symptoms you must contact Kidzone immediately and you must follow up with your physician. You must be fever free 72 hours in order to return to Kidzone. If you have vomiting and diarrhea you must be symptom free 48 hours in order to return to Kidzone.

Daily Temperature Checks

Temperature Checks

As fever is the key indicator of COVID-19 in children, we will check each child's temperature upon daily arrival to the program. Staff will also be asked to take their own temperatures upon arrival to work. Staff will re-check children's temperatures throughout the day if they appear ill or "not themselves" (e.g., flushed cheeks, rapid or difficulty breathing without recent physical activity, fatigue, or extreme fussiness).

When children arrive to the program, temperature checks will occur

before children enter the building.
before children enter their classroom.

Each child's temperature will be taken by:

program staff.

The following staff members will be responsible for temperature checks:

Kidzone teachers will check your child's temperature each morning upon arrival and after lunch and again after nap time. Kidzone teachers will keep a log on each child's temperature and symptoms check throughout the day.

To minimize potential spread of illness, staff will:

1. wear a face mask while taking the child's temperature.
2. wear disposable gloves, which will be changed before the next check if physical contact with the child occurred.
3. wash their hands (using soap and water for 20 seconds or using a hand sanitizer with at least 60% alcohol) between checks.
4. **disinfect non-disposable thermometers between uses (e.g., cleaned with an alcohol wipe or isopropyl alcohol on a cotton swab).**

Responding to Symptoms and Confirmed Cases of COVID-19

Responding to COVID-19 Symptoms On-Site

If a child or staff member has a temperature above 100.4 degrees and/or symptoms such as persistent cough, difficulty breathing, chills, diarrhea, or vomiting, they will be sent home immediately with the recommendation to contact their primary care physician/medical provider. If anyone shows emergency warning signs (e.g., trouble breathing, persistent pain/pressure in the chest, new confusion, inability to wake or stay awake, or bluish lips or face), we will seek medical care immediately.

If a child develops symptoms during care hours:

- Parents will be contacted for prompt pick-up.
- The child will be isolated from other children and as many staff as possible (the child will not be left alone).

If a staff member develops symptoms during care hours:

- If no other caregiver is immediately available to be with children, the staff member will put on a cloth face covering (if not already on) and limit close interactions with children until they can be relieved by another staff member.

Reporting Exposure

Reporting Exposure

If a child, staff member, family member, or visitor to our program shows COVID-19 symptoms or tests positive for the virus, we will contact our local health department and licensing consultant. Based on the guidance of the local health department, we will determine whether to close individual classrooms or our facility, the duration of the closure, and other next steps. When communicating with families and staff about any COVID-19 cases, we will respect the privacy of individuals and not share health information of a specific person.

Our local health department can be contacted at:

269-926-7121

Returning to the Program After Experiencing Symptoms and/or a Positive COVID Test

If a staff member or child has a fever OR a cough (but no other symptoms):

If a staff member or child has a fever or cough (but no other symptoms): we will follow the existing illness Kidzone policies. Kidzone staff and children should be fever free for 72 hours before returning.

If a staff member or child exhibits multiple symptoms, possible exposure is expected, or receives a positive test: Kidzone will coordinate with the health department to make an appropriate determination for returning back to school following a COVID-19 test.

If a staff member or child exhibits multiple symptoms of COVID-19, possible exposure is expected, OR an individual tests positive for COVID-19, the individual must stay home until:

They have been fever-free for at least 72 hours without the use of medicine that reduces fevers AND
Other symptoms have improved AND
At least 10 days have passed since their symptoms first appeared.

As per [Executive Order 2020-36](#), if staff or their close contacts have possible or confirmed cases of COVID-19, staff will be allowed to remain home without penalty of discharge, discipline, or other retaliation.

To accommodate for the potential need to quarantine staff or allow for longer absences from work than normal, we will implement the following staffing plan to ensure we can meet staff to child ratios:

Kidzone will have administrators fill in for staff that may have to be home for illness. Kidzone will have substitutes available to assist when needed.

Because child care staff members are part of Michigan's essential workforce, they are eligible to be tested for COVID-19.

Staff can visit [this resource](#) to locate a nearby test site.

Maintaining Consistent Groups

During this time, we will maintain the following group sizes:

Leave blank if this age group does not apply to your program.

Infants and Toddlers, birth until 30 months of age

4

Preschoolers, 30 months until 3 years of age

10

Preschoolers, 3 years of age until 4 years of age

10

Preschoolers, 4 years of age until school-age

10

School-agers

12

To support these smaller group sizes, we will implement the following policies:

Kidzone will decrease enrollment numbers temporarily. Each classroom will have less children than usual and with less rotation of teachers.

To minimize potential spread of COVID-19, we will engage in the following best practices:

1. To the extent possible, classrooms will include the same group of children and providers each day.
2. Each group of children will be kept in a separate room.
3. We will limit the mixing of children across groups by staggering times for outdoor play and other activities where children from multiple classrooms are typically combined.
4. Canceling or postponing field trips and special events that convene larger groups of children and families.
5. Limiting non-essential visitors, volunteers, and activities including groups of children or adults.
6. Any in-person staff meetings will be limited to 10 people and social distancing requirements will be followed as much as possible.

Drop-Off and Pick-Up Procedures

We will use the following recommended practices during drop-off and pick-up times to protect the health of children, families, and staff.

1. Only one adult per family should be present at drop-off/pick-up. Ideally, this would be the same parent or designated person every day, though we recognize this is not always possible.
2. Children should enter the building without car seats.
3. We will provide hand sanitizer or wipes at the sign-in station for parents/guardians to clean pens/keypads between each use.
4. We will have a hand hygiene station at the entrance to our building so children and parents can clean their hands.
5. We will ask parents and other visitors to wear masks while in the building.
6. Staff will greet children and families curbside or outside the building and walk children in and out of the building.
7. We ask that parents avoid congregating in a single space or a large group.

Other policies related to drop-off and pick-up include:

Kidzone will setup a sign in and out document for each classroom on a table outside of the front entrance. If a Kidzone staff take your child to your car outside of the building we will bring document for you to sign at your car. Kidzone is asking all parents to call when you are on your way to pick up or drop off your child or you can use our daily connect app on your phone to notify us.

Hand Washing

We will reinforce regular health and safety practices with children and staff and continue to comply with licensing regulations and CDC hand washing guidelines as follows:

- Staff and children will wash hands often with soap and water for at least 20 seconds.
- Soap and water are the best option, especially if hands are visibly dirty. If hands are not visibly dirty, alcohol-based hand sanitizers with at least 60% alcohol can be used if soap and water are not readily available. Staff and children should cover all surfaces of their hands with hand sanitizer, rubbing them together until they feel dry.
- Staff should assist children with hand washing (especially infants who cannot wash hands alone) and use of hand sanitizer to ensure proper use and prevent ingestion.
- Staff and children (with frequent reminders and support) will cover coughs and sneezes with a tissue or sleeve and wash hands immediately after.
- Wearing gloves does not replace appropriate hand hygiene.
- Hand hygiene is especially important after blowing one's nose, going to the bathroom, before eating or preparing food (or helping children do any of these actions).

Cleaning and Disinfecting

Cleaning and Disinfecting Surfaces

We will engage in the following cleaning and disinfecting practices in accordance with CDC recommendations:

1. Daily cleaning/disinfecting of **high-touch surfaces** (e.g., sinks, toilets, light switches, door knobs, counter and tabletops, chairs).
2. Normal routine cleaning of **outdoor spaces**, with special attention to high-touch plastic/metal surfaces (e.g., grab bars, railings).
3. Regular cleaning of **electronics** (e.g., keyboards, parent/staff check-in kiosks) according to manufacturer's instructions.
4. Use of a **schedule** for regular cleaning and disinfecting tasks.
5. Ensuring staff wear **disposable gloves** to perform cleaning, disinfecting, laundry, and trash pick-up, followed by hand washing.
6. Cleaning **dirty surfaces** using detergent or soap and water prior to disinfection.
7. Use of **CDC-recommended disinfectants** such as EPA-registered household disinfectants, diluted bleach solution, and/or alcohol solutions with at least 70% alcohol
8. Keeping cleaning products **secure and out of reach** of children, **avoiding use near children**, and ensuring **proper ventilation** during use to prevent inhalation of toxic fumes.

Cleaning and Disinfecting Toys

We will engage in the following best practices to clean and disinfect toys:

1. We will clean toys frequently, especially items that have been in a child's mouth.
2. We will set aside toys that need to be cleaned (e.g., out of children's reach in a dish pan with soapy water or separate container marked for "soiled toys").
3. We will clean toys with soapy water, rinse them, sanitize them with an EPA-registered disinfectant, rinse again, and air-dry.

Safety Equipment

Face Mask/Coverings for Staff

Our plan for staff around face masks/coverings is as follows:

Given that we are maintaining consistent groups, staff do not need to wear a mask when with their consistent group, but should wear their face covering at all other times when at the facility.

Use of Gloves

Staff will wear gloves in a manner consistent with existing licensing rules (for example, gloves should be worn when handling contaminants, changing diapers, cleaning or when serving food). Staff members should wash hands before putting gloves on and immediately after gloves are removed. Gloves are not recommended for broader use and do not replace hand washing..

Face Masks/Coverings for Children

Our plan regarding children wearing cloth face coverings during care is:

Children will maintain consistent groups, children do not need to wear a mask when with their consistent group. The CDC does recommend children over 2 years old to wear a mask. If parents want their child to wear a mask they can send them with a mask. Kidzone will not be able to monitor the child to keep masks on throughout the day.

Partnering and Communicating with Families & Staff

Communicating with Staff and Families

We will actively communicate with staff and families to determine when they will return to work/care if they have been out, discuss concerns or questions, share new policies and expectations, and confidentially discuss any extenuating circumstances that have emerged and/or any health concerns/conditions that may elevate risk for complications if exposed to COVID-19.

The staff responsible for handling questions and outreach for **staff** is : Karla Pepple

The staff responsible for handling questions and outreach for **families** is : Karla Pepple

Training Staff

To support staff in effectively engaging in best practices and making personal decisions, we will provide learning opportunities to help all of us understand how COVID-19 is transmitted, the distance the virus can travel, how long the virus remains viable in the air and on surfaces, signs and symptoms of COVID-19, and our new policies and procedures as outlined in this plan.

Supporting Children's Social-Emotional Needs

Staff and families will partner together to support the needs and emotional reactions of children during this time. We anticipate that children will experience a wide range of feelings during this transition period. Some children will be relieved, some will have initial challenges with separation from their parent(s), some may demonstrate anger at the "disappearance" of their child care provider, and some may act out toward other children. Whatever the reactions, we acknowledge that staff and families may need some new tools in their toolkit to assist the child with emotional regulation and we will work together to support all caregivers.

We will make the following resources available for staff and families to support children:

[Crisis Parent and Caregiver Guide](#), from the Michigan Children's Trust Fund

[Talking with Children about COVID-19](#), from the CDC

Supporting Staff Members' Social-Emotional Needs

To ensure the well-being of the children, it is also imperative to ensure the well-being of their teachers and caregivers, and to provide them with the emotional and administrative supports necessary during this time of re-integration, and in the months ahead. As essential workers in the COVID-19 pandemic, we understand our staff may have worries about their own physical or psychological health, and the potential risk to their family members at home. Because young children internalize the stress of the adults who care for them, we know it is vitally important to provide supports and services to ensure the emotional well-being of our staff.
