**Hartsville Chamber and Sound Solutions Hearing Care Host Hearing Loop Workshop**

*A second session at the Darlington Library is also available*

**Hartsville, SC** – Sound Solutions Hearing Care is sponsoring two free workshops for community members to learn about hearing loop systems. The events will be held on Wednesday, September 17. The Hartsville workshop begins at 10:00am in the Greater Hartsville Chamber of Commerce Board Room; the Darlington workshop begins at 2:00pm at the Darlington Library. Sound Solutions has booked hearing loop system expert Scott Peyton to speak at these workshops and answer any questions from members of the community.

Hearing loop systems are a technological advancement in hearing care that allows individuals with hearing aids or cochlear implants to experience rich sound in places such as churches and auditoriums by broadcasting the sounds directly to their devices. Sound Solutions Hearing Care is dedicated to improving the quality of life for those experiencing a loss of hearing clarity; introduction of loop technology to the Hartsville area is a great effort in this regard.

Those interested in attending one of these workshops can contact Andrea Kiester with Sound Solutions to reserve a seat; the events are free, but space is limited. Call 843-357-HEAR (4327) for reservations or more information.
