

Primary & Multi-Specialty Clinics of Anaheim, Inc., also known as **Gateway Medical Center**. We have provided comprehensive Primary Medical Care, and Urgent Care to our patients in the community since 1984.

During the COVID-19 pandemic, our highest priority is to provide top quality healthcare while maintaining the health and safety for our providers, staff and patients.

- We have distributed approximately 50,000 COVID-19 educational materials to our patients and others in the community via mail, email and through our patient care portal.
- We have implemented a COVID-19 drive through testing station at our main campus in Anaheim. Our first test was performed on 03/20/2020, since then, we have performed over 300 COVID-19 tests with a 48 to 72 hour test result turn-around time.
- We have conducted over 6,800 telehealth (some with both audio and video features) visits for our patients in a safe and secure manner.

Our patients have appreciated our outreach and extra efforts in continuing to care for their medical needs. We want to thank all Gateway staff and providers both behind the scenes and on the front line during this crisis.

We have recently begun to re-open our clinics for in-person appointments as state and local guidelines allow. We have implemented reopening safety procedures, such as wearing masks in clinic for patients and staff, social distancing and strict cleaning and sanitizing procedures.

Throughout the duration of the COVID-19 pandemic, our team is working selflessly, committed to providing the best healthcare services for our community, while always prioritizing the health and safety of our staff, patients and providers.
