About the 2020 Census

The U.S. Constitution mandates a census of the population every 10 years. The 2020 Census counts everyone who lives in the U.S. on April 1, 2020. Census statistics help determine the number of seats each state holds in the U.S. House of Representatives and how billions of dollars in federal funds will be allocated by state, local, and federal lawmakers every year for the next 10 years.
