

JobsOhio, on behalf of Governor DeWine, has asked local Economic Development organizations to develop a list of Ohio manufacturers that make medical personal protective equipment (PPE) or could convert to making it.

Given the current crisis, we wanted to reach out to you to determine if you might have the capacity to assist in this time of national emergency and contribute directly to the effort to combat COVID-19.

JobsOhio is seeking information on manufacturing capabilities for the products listed here - most importantly, the first 13. Please note we are only in the process of quickly obtaining information at this time - there is no feedback yet as to if/when these processes may be needed, but if you have information, please email Jessica Gribben at jgribben@chooserichland.com with the following:
