Doug is a greater Milwaukee, WI area architecture, commercial, real estate, and drone photographer that is passionate about capturing stunning imagery. His life long study of visual perception gives him a system and vocabulary that allows him to efficiently and effectively focus ideas into concrete visual material that tells your story in a fresh and interesting way.

As a FAA certified Part 107 Commercial Drone Pilot with a minimum of \$1,000,000 in drone liability insurance, he can help you sell better, see better, and work better with either of his ultra-safe drones with 4K video and high resolution still camera.

A pinnacle accomplishment is the publishing of his book - "Holy Week in Spain" - a pictorial survey of the activities of penitents during the last week of lent in small villages of southern Spain. He chronicles each day's penance procession brought forth by religious brotherhoods and fraternities by focusing on their dress, accouterments, and their wonderful ornate "Pasos" (floats).

If your organization needs to standardize the head shots of key personnel or the whole organization, he can make the process very convenient by coming to your facility with a portable studio. And if leadership needs strong, stunning portraiture that visually implies firm guidance; he can deploy dramatic lighting, deft usage of background, and creative capture of expression to deliver a lasting image.

Journey through some of his work in this website gallery and you will be amazed!
