

CYBERSECURITY CONFERENCE SALT LAKE CHAMBER MARCH 27, 2019

Cybersecurity is a shared risk and ultimately a shared responsibility. Through this conference, experts from both the national and local level are invited to educate the business community about their risks and responsibilities and contribute to building a more secure economy. This conference is not only a means of making valuable connections and promoting brand recognition, but also an impactful way to fortify our state and preserve Utah's premier business environment. Presenters will have the opportunity to teach attendees critical skills that have become a necessity in today's modern economy.

Sponsorship benefits are contingent upon signing up before January 15
