

Chamber Testimonials

“First Data has been great to work with. Regular check-ins from our local rep has helped us establish a relationship with the same person our members deal with, which our members appreciate. They like knowing who they will be talking to, and we love having a direct line to the same person every time. First Data also makes it very easy to market their service to our members. Providing informational webinars, template emails, flyers, talking points, etc. It saves us so much time and really helps us sell the program. Since implementing these things, we’ve been able to sell the program much easier than before. It’s such a relief knowing we have a partner we can rely on like this.”

Haliburton Highlands Chamber of Commerce

“As the Executive Director of the Stoney Creek Chamber of Commerce, I wanted to share the success our Chamber is having with the First Data program.

Since implementing First Data’s strategy, to identify the right business verticals and make warm introductions, we’ve found that the savings our members are receiving is significant. Not only does it yield a strong ROI on their Chamber membership, but also adds to a much healthier bottom line for their respective businesses.

As a Chamber, we are the “connectors” within our communities with a trusted voice. We are proud to announce that in January 2017, 6 of our members signed on with the First Data program. One merchant in particular, is a 5MM annual credit card processing account.

With the right game plan, 15-20 minutes a month can generate long-lasting, recurring, referral fees from the First Data program.”
