## 2019-20 Sponsorship Form

The Chamber of Commerce is implementing a community development leadership program, “Leadership in the Valley,” to begin in September of 2019. This nine-month program will provide day-long sessions covering a variety of topics including a leadership kick-off, business and economic development, community and the arts, agriculture and environment, law and public safety, government, education, diversity, and health and human services. The interactive program will offer a mix of discussions and presentations focused on what defines community leadership, guest speakers, field trips, and opportunities to learn from professional leaders; as well as, to participate on a community project throughout the duration of the nine-month program. A formal Graduation will be held in May of 2020, with a graduating class between 25-40. Please see the back portion of this document for the Leadership in the Valley curriculum. People who attend the program will have a more comprehensive view and investment in our community, its value, and will be more likely to become involved and give back as a community leader.
