**16-686**-Offered by Councillor Knight

Whereas, the American Society of Civil Engineering's 2013 Report Card for America's Infrastructure showed that more than 1.3 million miles of US roadways are in poor or mediocre condition, and

Whereas, American motorists average \$324 in additional expenses for repairs and operating costs attributable to roadways in poor or mediocre conditions, and

Whereas, the historic trend in municipal roadway maintenance shows that cities allocate limited maintenance budgets based on a reliance of outdated, costly, and time consuming pavement condition studies, and

Whereas, the American Road and Transportation Builders Association finds that 12.5% of Massachusetts interstates, expressways and other major roads are in need of total resurfacing or restructuring, and

Whereas, according the Federal Highway Administration the overall rating of roadway quality in Massachusetts is designated as fair to mediocre, and that 89% of all roadways in Massachusetts are maintained by local Cities and Towns, and that local roads in Massachusetts carry 66% of the total traffic volume, and

Whereas, there is an evident need for the implementation of a pavement inspection and management program in the City of Medford,

Be It Resolved the Medford City Council request the City Administration to explore the services developed by Burlington, MA based Street Scan, Inc., or any other entity with similar technology, to perform a pavement conditions study of Medford's roadways and establish a Pavement Inspection and Management Program for the City of Medford.

Be It Resolved that the Medford City Council discuss the results in Enforcement of City Ordinances and Health Regulations resulting from complaints posted on SeeClickFix. Be it further resolved that the City figure out a better strategy before closing out complaints as many residents are complaining that complaints are being closed out too quickly with little to no remedy.
