FOR IMMEDIATE RELEASE

V3 Media Group Receives Small Business of the Quarter Award

(Opelika, AL October 24, 2018) The Opelika Chamber is excited to announce that V3 Media Group was selected as the Small Business of the Quarter at the recent Chamber's Business over Breakfast. This award is given to a small business quarterly that has gone above and beyond to help their clients, given great customer services and shown generosity.

Founded originally as a logistics company in 2004, V3 Media developed freight management software to help automate their own processes. After a few years, they sold logistics side of the business, and moved towards web-based software, applications, and development.

Today, they are primarily a digital marketing firm, creating solutions online and through digital graphics. Typically, they spend the majority of their time in 3 main areas: website design & development, SEO & digital public relations, and video production.

Their clients range from orthopedic surgeons, non-profits, and clothing boutiques to large universities, injection molding manufacturers, and commercial construction companies. Each different business offers engaging challenges and opportunities for their team of designers to think through a fully-functional conceptual design that works for mobile devices, desktops, and everything in between.
