

NUMBER OF GOODS-EXPORTING ENTERPRISES – JUNE 2020

[Statistics Canada](#) reports the total number of goods-exporting enterprises increased by 6.1% from the previous month. The agency notes the increase in the number of exporting enterprises was widespread across all provinces. There were 20,585 exporting enterprises in June, an increase of 1,762 firms from May.

As outlined in a [previous Data Points](#), small goods-exporting enterprises (less than 50 employees) have been particularly hard hit by the pandemic. June showed further signs of recovery as the number of small exporting enterprises increased by 9% from the previous month, but remain 17% lower than the number of small exporting enterprises in June of 2019.
