

## 2014-2015 LEADERSHIP Greater Waseca Graduates

I thoroughly enjoyed the LEADERSHIP Greater Waseca program. It was a great experience which allowed me to get an in-depth look at all of our community assets. I learned how to better serve our community, and had the ability to network with a great group of professionals.

- Tiffany Lynch

I found the LEADERSHIP Greater Waseca program beneficial for connecting with people in other businesses and organizations. I learned about programs, opportunities and businesses that all of Waseca can benefit from having. Anyone who owns a community-oriented business or who is significantly involved in volunteer efforts should consider participation in LEADERSHIP Greater Waseca.

- Kris Markeson

The LEADERSHIP Greater Waseca was an eye-opening and valuable program. The afternoon lectures/discussions provided a great opportunity to step back, learn and think differently, not only about our community but myself! The experience has given me the courage to use my strengths at work, home, church, and in my community. Thanks for much for this opportunity.

- Holly Bramer

It was very interesting touring the different companies in Waseca. I learned more about community activities and companies in the Waseca area. I also enjoyed listening to and interacting with Jim Krile. The topics were very though provoking and insightful.

- Lynell Van Asperen

The program was a success in my opinion. I am fairly new to the community, and this provided an opportunity to get to know some of the leaders of the community. It also provided the ability to find a young individual, from Waseca, gainful employment. The opportunity provided by Winegars could be a lifelong career for this individual.

- Steve Gordon

This opportunity far exceeded my expectations and I am fortunate to have participated in this training. I have met many wonderful and talented individuals; and though we may work in different professions, have a common goal of nurturing and growing this special community. I feel this opportunity has helped me focus on the strengths that I possess and how to effectively and intentionally put them into practice both professionally and personally. My eyes were opened to the multitude of assets available to the citizens of Waseca, while also recognizing the work that still needs to be accomplished. This program has helped me to acknowledge and appreciate each entities' unique needs, and has helped us all in creating a sense of ownership in our community.

- Elizabeth Beery
