Section 2

PROJECT- J U D G I N G C R I T E R I A

Projects will be judged on the information you provide in response to the following questions.

A. Brief Project Description:

(120 Words or less) *If selected, this description will be used for award's bio

B.. Overcoming Challenges & Teamwork (300 words or less)

Describe any challenges or issues that the design and construction team faced, managed and overcame during construction. Be specific about the problems and solutions. Also describe how teamwork was used to accomplish the project goals. Give specifics.

C. Safety (300 words or less)

What is the safety record for the project? Provide specifics, such as the OSHA incident rate, recordable incidents vs. man hours, lost-time accidents, experience modification ratio, etc. What training/safety programs were implemented to prevent injuries and assure a safe jobsite?

D. Innovation & Contribution to the Industry/Community (300 words or less)

In what ways is this project innovative, or help elevate industry standards? Describe any unique construction techniques, design elements, materials or new technology used for the project. How will this help the project benefit the client, community or construction industry?

E. Construction Quality & Craftsmanship (300 words or less)

Describe how the construction team excelled in terms of quality and craftsmanship. How did the contractor and subs exceed expectations and achieve extraordinary results? If the project was completed under budget and completed early, how was that accomplished? If your project was not on time or on budget, please explain the circumstances.

F. Function and Aesthetic Quality of the Design (300 words or less)

Describe how the design fulfills the project's function, and provide information on the aesthetic quality of the design, whether architectural or engineering. The response should include input from the project's designer.

G. Additional Information (optional - 300 words or less)

Please include any additional information that the jury should consider regarding the project.
