FROM THE MAYOR

Neighbors,

These past few months have been a trying time for our community as we continue to fight COVID-19. So many have been impacted, either through loss of wages, the closing of businesses, and some have even the loss of friends or family. Our community has worked tirelessly to “flatten the curve” and I want to thank everyone for their efforts and sacrifice. While this focus on health and prevention continues, we must also look to the future, preparing to gradually restore and re-open our economy at the appropriate time, and in the right way. This will not happen overnight, and it will take our entire community working together, but we will overcome this health crisis.

We are currently evaluating when would be the appropriate time to begin easing restrictions from the Stay at Home (SAH) Order. At this time, Kansas Governor Laura Kelly’s state-wide SAH order is expected to expire May 3. Unless she chooses to extend, local governments will need to determine what preventative measures are in place to protect their residents. Before the relaxation of local SAH Orders in Wyandotte County, our Chief Medical Officer and local public health experts have recommended that we see a decline from the peak numbers of hospitalizations and deaths, followed by an additional fourteen-day incubation period before relaxing or lifting any local SAH order. The goal is to protect all of our citizens, especially the most vulnerable, prevent health systems from being overwhelmed – and gradually restore and re-open our community.

Experts agree that the virus continues to spread in many communities. Because there is no known vaccine for COVID-19 at this time, and efforts to ramp up expanded testing and contact tracing capabilities continue, we anticipate a longer-term phased approach with prolonged intermittent levels of social distancing and surveillance in order to protect public health in Wyandotte County. This tiered plan will give us the opportunity to evaluate each phase before moving forward, ensuring we are measured and prudent in the relaxation of restrictions, while simultaneously working to restore our local economy, allowing community organizations, businesses, workers, and families to return to some semblance of normalcy when appropriate. While we want to move as quickly as possible, our number one priority is the health of our community.

I want to thank the ReStart WYCO Committee and the entire community for their efforts and assistance in developing these guidelines. We have received nearly 400 survey responses from businesses, residents, and workers across Wyandotte County on how best to proceed, and we thank everyone for their inputs and recommendations. These guidelines will continue to evolve as we move forward and gather more data and health metrics, and recommendations from local, regional and national economic and health experts. We recognize the hardship this public health crisis is placing on families and businesses across Wyandotte County, and I remain heartened by our community's continued commitment and sacrifice to protect its most vulnerable, and its willingness to work together to defeat this pandemic threat.

Sincerely,

A handwritten signature in black ink, appearing to read "David Alvey".

David Alvey, Mayor

PURPOSE AND INTRODUCTION

As we approach a time when it is safe to relax the Stay at Home order, this document has been prepared to offer guidance on safe, stepwise re-opening to various public-facing sectors in Wyandotte County. COVID-19 is unfortunately still spreading in our community, so we must continue to take measures to ensure the safety of our most vulnerable and continue to ensure our healthcare resources are not overburdened. In an effort to do this, we will present here four “zones”, each of which represents a different level of guidance to help save lives and reduce transmission of the virus.

MOST RESTRICTIVE

LEAST RESTRICTIVE

STAY AT HOME	RED ZONE	YELLOW ZONE	GREEN ZONE
<p>“Stay at Home” orders are quite stringent and ask that only essential businesses remain open. There is still a chance we may need to Stay at Home again in the future.</p>	<p>The Red Zone is slightly relaxed compared to Stay at Home but is far from “business as usual”. Red Zone still recommends the highest level of caution for vulnerable community members, while also offering guidance on how some businesses may open safely.</p>	<p>During Yellow Zone restrictions, more businesses may open, but caution is still required.</p>	<p>Green Zone is the least stringent phase and offers few staffing restrictions while still urging some cautions.</p>

SECTORS ARE REQUIRED TO COMPLY WITH ZONE GUIDANCE AT A MINIMUM. BEST PRACTICES THAT GO BEYOND THESE GUIDELINES ARE UP TO THE SECTOR. IN INSTANCES WHERE GUIDELINES CONFLICT WITH OTHER COUNTY OR NATIONAL GUIDANCE, WYANDOTTE COUNTY SPECIFIC GUIDELINES PREVAIL.

How do we know when it's time to change Zones?

In order to either escalate or relax between Zones, we will be tracking the following carefully:

1. The number of **hospitalizations** AND **deaths** in Wyandotte County and surrounding area hospitals *over a 14-day period* AND the **percentage positive rate** of testing in Wyandotte County and surrounding area *over a 14-day period* (the maximal incubation period of COVID-19) .

And we will require the following:

2. Rapid diagnostic capacity to test all people with symptoms and, if possible, their close contacts
3. Healthcare facilities have capacity to care for all patients, with adequate PPE
4. Capacity to contact trace all new cases and close contacts

ENFORCEMENT:

We have taken great care to create health orders with the intention to keep Wyandotte County residents safe. The Unified Government Public Health Department will enforce orders with support from the Police Department and the Sheriff's Office. If you violate a Health Order you may be issued a municipal court misdemeanor citation which can result in a maximum fine of \$500 and a jail sentence of up to 30 days. Each occurrence is a separate violation subject to citation.

We encourage you to consult the following guidance on creating a safe work environment for your employees. A safe environment in the workplace will reduce public fear and assure both the public and your employees that you are taking COVID-19 seriously:

- <https://www.cdc.gov/coronavirus/2019-ncov/community/guidance-business-response.html>
- <file:///C:/Users/adamh/AppData/Local/Microsoft/Windows/INetCache/Content.Outlook/BUXKKIUI/SafeReturn-GUIDE%20KC%20Greater%20Chamber.pdf>

You must provide necessary supplies to keep your workers safe. This may mean masks, gloves and gowns, eye protection, products for frequent hand sanitation and tools to work from home.

Guiding Principles during “Stay at Home” and ALL Zones:

- Whenever possible, stay at home and avoid unnecessary travel.
- Maintain at least 6 feet of distance from all individuals who do not live in your residence.
- Masks should be worn at all times in public when you cannot assure you will be able to maintain a 6-foot distance from all others.
- Practice good hand hygiene by washing hands regularly or using hand sanitizer frequently
- Stay home if you have any symptoms of illness
- Seek medical care immediately if you have worsening signs of illness
- Do not touch your face with un-sanitized hands
- Remember some community members are at high risk of becoming very ill with COVID19. It is up to all of us to keep them safe. High risk individuals (people above the age of 60, and those with underlying medical conditions) should take extra care to stay home as much as possible, including working from home, avoidance of travel and avoiding visits or close contact with anyone who does not live in their place of residence.
- Businesses should thoroughly clean common areas, areas where customers interact with staff, and frequently touched surfaces often, and at least twice daily.
- Businesses should encourage telecommuting whenever possible.
- Daily workplace screenings for fever and other COVID-19 symptoms should be documented, and employees with COVID-19 symptoms should be reported to the Unified Government Wyandotte County Public Health Department.
 - ***Symptoms of COVID 19 include: fever, cough, shortness of breath, sore throat, headache, chills, body aches, fatigue (tiredness), nausea/vomiting/diarrhea, loss of taste or smell***
- Individuals with symptoms should be denied entry to work and should be sent promptly for COVID 19 testing at the Public Health Department or their primary care physician’s office.

GENERAL POPULATION

GUIDANCE	STAY AT HOME	RED ZONE	YELLOW ZONE	GREEN ZONE
Physical Distancing	<ul style="list-style-type: none"> Stay at home except for completing essential activities. Never congregate with others who are not members of your immediate household. Maintain a 6 feet distance from others at all times. Solitary or group exercise with members of your immediate household is encouraged. Vehicles should only transport individuals from the same household or co-workers who must rideshare to conduct essential business. Public transportation may only be used for essential activities. Masks should be worn when traveling with those outside immediate household. 	<ul style="list-style-type: none"> Stay at home as much as possible Never congregate with others who are not members of your immediate household. Maintain a 6 feet distance from others at all times. Outdoor activities with other individuals (up to 10) in which adequate social distancing is maintained is allowed. Solitary or group exercise with members of your immediate household is encouraged. Vehicles should only transport individuals from the same household or co-workers who must rideshare to conduct essential business. Public transportation may be used for essential activities and 	<ul style="list-style-type: none"> Staying at home is safest. Avoid social activities where groups of more than 25 people are gathered except in certain very large venues (see below). Maintain a 6 feet distance from others as much as possible especially from those who are not members of your immediate household. Exercise with appropriate social distancing is encouraged. Car, bus or street-car travel advised; masks should be worn when traveling with those outside immediate household. Elevators – use stairs if possible. Limit individuals in the same elevator to 50% of elevator capacity. 	<ul style="list-style-type: none"> Staying at home is safest. Avoid social activities where groups of more than 50 people are gathered except in very large venues (see below). Maintain a 6 feet distance from others as much as possible especially from those who are not members of your immediate household. All forms of travel (air travel included) are acceptable when necessary; masks should be worn when traveling with those outside immediate household. Elevators – use stairs if possible. Limit individuals in the same elevator to 50% of elevator capacity. Clean buttons regularly.

	<ul style="list-style-type: none"> Elevators – use stairs if possible. Limit individuals in the same elevator to 25% of elevator capacity. Clean buttons regularly. 	<p>if adequate social distancing is maintained.</p> <ul style="list-style-type: none"> Masks should be worn when traveling with those outside immediate household. Elevators – use stairs if possible. Limit individuals in the same elevator to 50% of elevator capacity. Clean buttons regularly. 	Clean buttons regularly.	
Hygiene	Wash or sanitize your hands frequently and as soon as you return home from public spaces.			
Personal Protective Equipment	Always wear a mask in public.		Wearing a mask in public is safest.	
Clinical Guidance	<ul style="list-style-type: none"> Seek testing at the Public Health Department or another clinical provider if experiencing COVID-19 symptoms. Seek medical care if needed for other conditions. Telemedicine visits and in-person visits are safe options for necessary medical care. 			

VULNERABLE POPULATIONS (>60 years old, immune compromised, underlying medical conditions)

GUIDANCE	STAY AT HOME	RED ZONE	YELLOW ZONE	GREEN ZONE
Physical Distancing	<ul style="list-style-type: none"> Stay at home if at all possible. Maintain a 6 feet distance from others at all times. Never congregate with others who are not members of your immediate household. Avoid travel except for solitary car travel or car travel only with members of your immediate household. Solitary or household unit exercise outside is encouraged. 			
Hygiene	Wash or sanitize your hands frequently and as soon as you return home.			
Personal Protective Equipment	Always wear a mask in public.			
Clinical Guidance	<ul style="list-style-type: none"> Seek testing at the Public Health Department or another clinical provider if experiencing COVID-19 symptoms. Stay in contact with your regular health care provider. Seek medical care if needed for other conditions. Telemedicine visits and in-person visits are safe options for necessary medical care.

BEYOND THE ZONES

Beyond phased re-opening may be employed, if there ceases to be new cases of the virus identified, but before a vaccine is widely available. This may be possible through “herd immunity”, but is a distant possibility given only approximately 1% of our community has been exposed to the virus at this time.

Criteria:

- Unrestricted staffing
- Venues can operate under limited criteria
- Vulnerable individuals (elderly or those with underlying health conditions) should continue to practice precautionary measures and minimize exposure to social settings.

WHAT TO DO IF YOUR WORKERS ARE SICK:

- If your employee is ill, they are required to go home and may not work. They should report their symptoms to the health department at www.wycokck.org/COVID-19, or they can call 311 for assistance. They may receive a COVID-19 test free of charge if they have symptoms such as fever, cough, shortness of breath, sore throat, headache, chills, aches, fatigue, loss of smell or taste, nausea/vomiting diarrhea within the last 48 hours.
- If they are positive for COVID-19, they must isolate themselves at home for the full duration of their illness, and then 10 more days past their final symptoms. This is to ensure reduction in spread of the virus.
- All potential contacts of symptomatic workers should be identified and sent home to quarantine for 14 days. If the original sick employee tests negative for COVID-19, they may return to work as soon as their illness resolves, and close contacts may be released from quarantine.
- The Health Department does not advise or provide re-testing of positive individuals. Proper isolation for 10 days past symptom resolution ensures reduction in viral shed, and at the end of this isolation period, they should be allowed to return to work.
- If you have identified several sick employees/attendees, please report this immediately to the Health Department. We will talk through the situation with you and offer support through guidance on testing and further measures to keep your business, school or place of worship safe.

APPENDIX A: EMPLOYEE SCREENING FORM

Name:

Date:

Employer:

Have you experienced any of the COVID-19 symptoms listed below within the last 48 hours?

- No
- Yes

If yes, check all that apply

- Fever
- Cough
- Shortness of breath
- Sore throat
- Headache
- Chills
- Body ache
- Fatigue
- Loss of smell or taste
- Nausea/vomiting
- Diarrhea

Supervisor signature

ESSENTIAL BUSINESSES

Essential businesses are organizations that provide the goods or services needed for an essential activity.

These include:

- Hospitals
- Childcare facilities
- Government operations
- Pharmacies, health care supply stores, and health care facilities, including optometrists
- Grocery stores
- Gas stations and auto repair facilities
- Garbage collection
- Hardware stores, plumbers, electricians, exterminators, and other service providers necessary to maintain the safety, sanitation, and essential operation of residences and other essential businesses
- Education institutions, for the purposes of facilitating distance learning
- Laundromats, dry cleaners, and laundry service providers
- Businesses that ship or deliver groceries, food, and goods directly to residents

CONCLUSION

The COVID-19 pandemic has impacted our country and local community in unimaginable ways. We have lost loved ones, economic and learning opportunities, and the ability to be near family and friends as we do our best to socially distance and contain the spread of this disease. These sacrifices are making a significant difference, and we believe that a phased re-opening of our community will leave us well positioned to both restart our economy and respond to resurgences in infection. We thank you for working hard to ensure the safety of our entire community, including our businesses, students, and parishioners. We are in this together, and we appreciate your help as we move forward.
