PLAYBOOK FOR REOPENING YOUR BUSINESS IN THE AGE OF COVID-19

WORK HARD.
WORK SMART.
WORK SAFE.

PFLUGERVILLE CHAMBER OF COMMERCE
Dear Business Leaders,

These unprecedented times have been challenging, to say the least. However, we’re proud of you for helping our community succeed, from donating meals to essential employees, to sewing masks, to simply sharing resources on social media. We are truly #PflugervilleStrong.

As we move forward, we know you are anxious to reopen your doors. To ensure the safety of our community and to help you navigate the new normal, we have created the Work Hard. Work Smart. Work Safe. playbook. This comprehensive guide includes many of the recommendations developed by our state leaders, along with guidelines from the CDC and other federal, state, and local agencies. This resource will act as a living document, which we will update as this fluid situation changes.

Though we know we all wish to return to our regular lives, we must take necessary precautions during this time. The last thing we want is for the virus to grow during this phase. This playbook is a guideline to help you safely serve your customers and accommodate your employees. If you have any questions, please contact the Pflugerville Chamber. We are here to help you.

Thank you for your support and courage as we continue to navigate through this pandemic together. We’ll continue to persevere the only way we know how: together.

Stay safe,

Shontel Mays
President and Chief Executive Officer
Pflugerville Chamber of Commerce

Jennifer Davis
Program Manager
Pflugerville Chamber of Commerce
DISCLAIMER

Please be advised that some or all of the information contained in this document may not be applicable to some businesses or places of work and may not include all information necessary for certain businesses and places of work. This document does not attempt to address any health, safety and other work place requirements in place prior to the age of COVID 19. As COVID circumstances continue to evolve, so will the public health and safety recommendations and requirements, and as a result this document may not include all current governmental or health expert requirements and recommendations. We strongly advise that before implementing any of the practices and procedures contained herein, you carefully evaluate all and consult with your own legal counsel and other advisors regarding the legality, applicability and potential efficacy of this information in your place of business and to determine what if any other recommendations or requirements may apply to your business.

The Pflugerville Chamber of Commerce bear no responsibility for any circumstances arising out of, or related to, the adoption, or decision not to adopt, any of the practices or procedures contained in this guide.
# TABLE OF CONTENTS

**GENERAL GUIDELINES FOR ALL INDUSTRIES, 4-14**
- Communicating with your team, 6
- Preparing your space, 7
- Cleaning + disinfecting, 8
- PPE, 9-10
- PPE tutorials, 11-12
- Types of masks, 13
- How long COVID-19 lives on surfaces, 14
- Hiring in the age of COVID-19, 15

**Agriculture, 16**

**Animal Services, 17**

**Childcare Facilities, 18-21**

**Close contact services, 22-25**
- Waxing salons | Tattoo facilities | Massage therapy, 22
- Hair salons | Barber shops, 23
- Nail salons, 24
- Tanning salons, 25

**Construction, 26**

**Entertainment venues, 27-30**
- Gaming, 27
- Bowling alleys + others, 28
- Museums, 29
- Movie theaters, 30

**Exercise facilities, 31**

**Financial services, 32**

**Food service | Bars | Coffee shops, 33-34**

**Manufacturing, 35**

**Medical services, 36-39**
- General, 36
- Dentistry, 37
- Optometry, 38
- Mental health, 39

**Offices/professional services, 40**

**Pharmacies, 41**

**Real estate, 42**

**Retail, 43-45**
- General, 43
- Jewelry, 44
- Groceries | Gas stations, 45

**Closing, 46**
GENERAL RECOMMENDATIONS TO PROTECT EMPLOYEES & CUSTOMERS

This playbook provides specific measures for business categories to aid in a safe, thoughtful reopening. The specific recommendations in each category support the overall goal of opening businesses in a way that protects employees and customers from exposure to COVID-19 and helps prevent the virus’s spread. Individuals’ temperature standards as used in this report will be in accordance with directions from the Travis County Department of Public Health.

It is also important that businesses take responsibility to ensure they have adequate supplies for their employees and customers such as soap, disinfectant, hand sanitizer, paper towels, tissue, face masks, etc. Companies should keep a minimum of a 15 day supply at all times.

EMPLOYEE + CUSTOMER PROTECTION

• Employees should wear PPE when possible.
• Customers should consider using face coverings while in public.

• Practice sensible social distancing, maintaining six feet between co-workers.
• All persons in the store will be required to maintain a social distance of at least six feet between each other. Sales registers must be at least six feet apart.
• The number of people inside the store will be limited to 50% of fire marshal capacity or 8 people per 1,000 square feet.
• When possible, open all non-essential doors to reduce the need for direct contact.
• Stores with higher traffic will mark spaces 6 feet apart at the sales registers and outside the entrance to the store.

• Employees who have a fever or are otherwise exhibiting COVID-19 symptoms will not be allowed to work.
• A sign will be posted on the store that individuals who have a fever, cough or any sign of sickness should not enter.
• Employees should avoid touching your eyes, nose and mouth – Do NOT shake hands.
• Employees will be required to take reasonable steps to comply with guidelines on sanitation from the Center for Disease Control and Prevention.
• Encourage workers to report any safety and health concerns to the employer.

• Provide a place to wash hands or alcohol-based hand rubs containing at least 60% alcohol.
• Train workers in proper hygiene practices.
• Sanitize any high-traffic areas, such as doorknobs, counters, etc.
• Customers will be required to use hand sanitizer upon entering the store.

• Limit cash handling.
• Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
• Sanitize point of sale equipment after each use, including pens.
• Provide hand sanitizer and disinfectant wipes at register locations.
KEEPING THE WORKPLACE SAFE

- Practice good hygiene
- Stop handshaking & avoid touching face
- Increase ventilation
- Use videoconferencing
- Adjust/postpone large gatherings
- Limit business travel
- Limit food sharing
- Stay home if you or a family member is sick
- Use booking system to stagger customers
- Limit cash handling
- Use online transactions
- Practice social distancing
- Hold meetings in open spaces
- Remind staff of hand washing
- Sanitize high traffic areas
- Communicate COVID-19 plan with staff
Communicating with your team

Communication during this time is incredibly important. Remain available to and transparent with your employees. Have conversations with employees about their concerns. Some employees may be at higher risk for severe illness, such as older adults and those with chronic medical conditions. Your team’s health is of the upmost importance, so loop employees in on your COVID-19 strategy for reopening.

- Provide education and training materials in an easy to understand format and in the appropriate language and literacy level for all employees, like fact sheets and posters.
- Develop other flexible policies for scheduling and telework (if feasible) and create leave policies to allow employees to stay home to care for sick family members or care for children if schools and childcare close.
- Actively encourage sick employees to stay home. Develop policies that encourage sick employees to stay at home without fear of reprisal, and ensure employees are aware of these policies.
- Educate workers performing cleaning, laundry, and trash pick-up to recognize the symptoms of COVID-19. Develop policies for worker protection and provide training to all cleaning staff on site prior to providing cleaning tasks.
- Talk with companies that provide your business with contract or temporary employees about their plans. Discuss the importance of sick employees staying home and encourage them to develop non-punitive “emergency sick leave” policies.
- Plan to implement practices to minimize face-to-face contact between employees if social distancing is recommended by your state or local health department. Actively encourage flexible work arrangements such as teleworking or staggered shifts.

The outbreak of coronavirus disease 2019 (COVID-19) may be stressful for people. Fear and anxiety about a disease can be overwhelming and cause strong emotions in adults and children. Coping with stress will make you, the people you care about, and your community stronger. Encourage employees to take breaks from watching, reading, or listening to news stories, including social media. Hearing about the pandemic repeatedly can be upsetting. Make sure employees are aware of mental health services your company provides. Encourage mindfulness, meditation and other healthy activities for your team. If an employee asks for help regarding their mental health, ask them to reach out to a healthcare provider.
PREPARING YOUR SPACE

Before reopening, you must sanitize your business to limit the spread of germs to your employees and customers. Keep this process limited to as few people as possible.

Disinfect your business before anyone returns to work. Sanitize and disinfect all areas, giving special attention to tools, workstations and equipment, restrooms, food service areas, common surface areas, phones, computers and other electronics.

Replace HVAC air filters or clean/disinfect existing filters. Increase ventilation by opening windows or adjusting air conditioning.

Put tight controls in place on who enters and exits the site during the cleaning shutdown. Limit the number of workers during this time.

YOUR BUSINESS SHOULD BE 100% DISINFECTED PRIOR TO ANYONE RETURNING TO WORK (OTHER THAN THOSE ASSISTING WITH THE DISINFECTION PROCESS).

DEEP CLEANING

COVID-19 “deep-cleaning” is triggered when an active employee is identified as being COVID-19 positive by testing. Sites may opt to have a deep cleaning performed for presumed cases, at their discretion.

Identify an approved external company that should carry out the deep cleaning activity; this company must have the minimum requirements of:

• Trained personnel to execute the process of cleaning, disinfection and disposal of hazardous waste.
• Proper equipment and PPE to perform the task.
• All necessary procedures and local authorizations or permits to perform disinfection services and manage any wastes generated.
• Use of approved COVID-19 disinfectant chemicals to perform this activity.
CLEANING + DISINFECTING AFTER OPENING

**CLEAN**
Clean surfaces using soap and water. Practice routine cleaning of frequently touched surfaces. High touch surfaces include: Tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.

**DISINFECT**

We recommend use of EPA-registered household disinfectant. Follow the instructions on the label to ensure safe and effective use of the product. Many products recommend:
- Keeping surface wet for a period of time (see product label)
- Precautions such as wearing gloves and making sure you have good ventilation during use

Water-diluted household bleach solutions may also be used if appropriate for the surface.
- Check the label to see if your bleach is intended for disinfection, and ensure the product is not past its expiration date. Some bleaches, such as those designed for safe use on colored clothing or for whitening may not be suitable for disinfection.
- Unexpired household bleach will be effective against coronaviruses when properly diluted. Follow manufacturer’s instructions for application and proper ventilation. Never mix household bleach with ammonia or any other cleanser.
Leave solution on the surface for at least 1 minute.

Alcohol solutions with at least 70% alcohol may also be used.

**SOFT SURFACES**

For soft surfaces such as carpeted floors, rugs, upholstery and drapes:
- Clean the surface using soap and water or with cleaners appropriate for use on these surfaces.
- Launder items (if possible) according to the manufacturer’s instructions. Use the warmest appropriate water setting and dry items completely.
- Disinfect with an EPA-registered household disinfectant if laundry isn’t possible.

**ELECTRONICS**

For electronics, such as tablets, touch screens, keyboards, remote controls, and ATMs:
- Consider putting a wipeable cover on electronics.
- Follow manufacturer’s instruction for cleaning and disinfecting.
  - If no guidance is available, use alcohol-based wipes or sprays containing at least 70% alcohol. Dry surface thoroughly.

**LAUNDRY**

For clothing, towels, linens and other items:
- Launder items according to the manufacturer’s instructions. Use the warmest appropriate water setting and dry items completely.
- Wear disposable gloves when handling dirty laundry from a person who is sick.
- Dirty laundry from a person who is sick can be washed with other people’s items.
- Do not shake dirty laundry.
- Clean and disinfect clothes hampers according to guidance above for surfaces.
- Remove gloves, and wash hands right away.
Personal protective equipment is protective clothing, helmets, goggles, or other garments or equipment designed to protect the wearer’s body from injury or infection. The hazards addressed by protective equipment include physical, electrical, heat, chemicals, biohazards, and airborne particulate matter. Businesses should keep a minimum quantity of 15-day supply of PPE. PPE can include masks, face shields and gloves.

**WHO SHOULD WEAR MASKS?**
Medical and isolation team members
Health screeners (i.e. a supervisor who takes employees’ temperature)
Disinfection team members
Those with broad exposure to customers or employees.

**WHO SHOULD WEAR FACE SHIELDS?**
Face shields are commonly used in healthcare and manufacturing. They can provide extra protection for those who must work within three feet of another person due to their job requirements. They are not necessary unless you work in healthcare/manufacturing, but they can help.

**WHO SHOULD WEAR GLOVES?**
Employees in isolation
Those performing disinfection of common surfaces
Employees handling trash
Employees handling food

Note: Gloves put employees at higher risk of exposure and are not recommended for general protective use for the following reasons:

- The COVID-19 virus does not harm your hands, so gloves provide no protection, and touching your face with contaminated hands, whether gloved or not, poses a significant risk of infection.
- Gloves often create a false sense of security for the individuals wearing them; people are more likely to touch contaminated surfaces because they feel they are protected from the virus because of the gloves when in reality, they are not.
- When wearing gloves, people are less inclined to wash their hands; this is counterproductive and puts others at higher risk; we want people to wash their hands because it is the number-one defense against any virus.
- Proper removal of gloves takes training; if contaminated gloves are not removed properly, our employees are exposed to greater risk.
REMEMBER: PPE IS ONLY EFFECTIVE IF IT IS WORN CORRECTLY. TRAIN YOUR EMPLOYEES IN CORRECT PPE USAGE.
STAY PREPARED

- Confirm business has an adequate supply of soap, disinfectant, hand sanitizer, paper towels and tissues.
- Confirm stock of PPE.
- Have touchless thermometers on-site for employee screening.
- Businesses should keep a minimum quantity of 30-day supply of disinfectant supplies.

MAKE YOUR OWN MASK

CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), especially in areas of significant community-based transmission.

Sewn Cloth Face Covering

Materials:
- Two 10"x6" rectangles of cotton fabric
- Two 6" pieces of elastic (or rubber bands, string, cloth strips, or hair ties)
- Needle and thread (or bobby pin)
- Scissors
- Sewing machine

1. Cut out two 10-by-6-inch rectangles of cotton fabric. Use tightly woven cotton, such as quilting fabric or cotton sheets. T-shirt fabric will work in a pinch. Stack the two rectangles; you will sew the mask as if it was a single piece of fabric.

2. Fold over the long sides ¼ inch and hem. Then fold the double layer of fabric over ½ inch along the short sides and stitch down.

3. Run a 6-inch length of 1/8-inch wide elastic through the wider hem on each side of the mask. These will be the ear loops. Use a large needle or a bobby pin to thread it through. Tie the ends tight. Don’t have elastic? Use hair ties or elastic head bands. If you only have string, you can make the ties longer and tie the mask behind your head.

4. Gently pull on the elastic so that the knots are tucked inside the hem. Gather the sides of the mask on the elastic and adjust so the mask fits your face. Then securely stitch the elastic in place to keep it from slipping.
Quick Cut T-shirt Face Covering (no sew method)

Materials:
- T-shirt
- Scissors

1. Cut a 7-8 inch (18-20 cm) horizontal strip from the bottom of the T-shirt. This can be done with the T-shirt on or off.

2. Cut a 6-7 inch (15-18 cm) horizontal strip from the bottom of the T-shirt. This can be done with the T-shirt on or off.

3. Tie the cut-out strips around your neck, then over the top of your head.

Bandana Face Covering (no sew method)

Materials:
- Bandana (or square cotton cloth approximately 20”x20”)
- Rubber bands (or hair ties)
- Scissors (if you are cutting your own cloth)

1. Fold bandana in half.

2. Fold top down. Fold bottom up.

3. Place rubber bands or hair ties about 6 inches apart.

4. Fold side to the middle and tuck.

5. 

Tutorials courtesy of CDC. For more information, visit www.cdc.gov/coronavirus/.
TYPES OF MASKS

BASIC CLOTH FACE MASK

This is your standard, everyday version of a face mask. It’s also the version recommended for public use in the midst of COVID-19. You can wear this type of face mask while going to the grocery store, gas station, or any other open public place. Most homemade masks fall in this category, such as a T-shirt or bandana mask.

SURGICAL MASK

Surgical masks are often blue with white borders. They fit loosely across your nose and mouth. These masks shield against the large droplets that come from a sick person’s cough or sneeze, but they’re too loose to protect against all germs.

N95 MASK

N95 respirator masks fit tightly around your face. They filter out 95% or more of the smallest particles in the air. They should only be worn by those in certain industries, such as healthcare. Some washable masks carry a higher rating than N95, such as the masks The DCH Foundation is currently sewing. Check with the manufacturer for rating information.

FACE SHIELD

Face shields are commonly used in healthcare and manufacturing. They can be worn in addition to a mask to increase protection, especially if an employee works near potentially infected individuals.
**HOW LONG COVID-19 LIVES ON SURFACES**

**Food**

Coronavirus doesn’t seem to spread through exposure to food. Still, it’s a good idea to wash fruits and vegetables under running water before you eat them. Scrub them with a brush or your hands to remove any germs that might be on their surface. Wash your hands after you visit the supermarket. If you have a weakened immune system, you may consider buying frozen or canned produce.

**Water**

Coronavirus hasn’t been found in drinking water. If it does get into the water supply, your local water treatment plant filters and disinfects the water, which should kill any germs.

**TO REDUCE YOUR CHANCE OF CATCHING OR SPREADING CORONAVIRUS, CLEAN AND DISINFECT ALL SURFACES AND OBJECTS IN YOUR HOME AND OFFICE EVERY DAY.**
If your business has slowed down due to the pandemic and you need to reduce employee working hours, you may be able to avoid laying off employees by submitting a shared work plan. The Shared Work program provides Texas employers with an alternative to layoffs. Texas Workforce Commission developed this voluntary program to help Texas employers and employees withstand a slowdown in business.

**Shared Work allows employers to:**
Supplement their employees' wages lost because of reduced work hours with partial unemployment benefits.
Reduce normal weekly work hours for employees in an affected unit by at least 10 percent but not more than 40 percent; the reduction must affect at least 10 percent of the employees in that unit.

**Notification for Employers**
Shared Work unemployment benefits are payable to employees who qualify for and participate in an approved Shared Work Plan. Workers may choose not to participate. Employees who qualify will receive both wages and Shared Work unemployment benefits. Employees need to have their weekly hours and wages reduced in order to participate in a Shared Work Plan.
For more information, see TWC’s Shared Work web page.

Both candidates and employers need to prepare for remote video job interviews as the "new normal" for the foreseeable future. Here are a few tips for conducting successful virtual interviews from home, whether you’re a hiring manager or a job seeker.

**Test out your Wi-Fi connectivity**
Be sure your home Wi-Fi connection is stable and test the connectivity strength in advance.

**Get familiar with your video conferencing tools**
Become familiar with the video conferencing tools and practice using them prior to the interview to avoid any day-of technical glitches. Download the software to your computer, launch it and run a practice session with a friend to test the audio and video. The ideal distance from the camera is usually two to three feet.

**Choose the right location**
You may be in a makeshift home office but take some time to scout out the perfect location in your home to conduct a video call. Your room should be well-lit and not have background noise.

**Dress for success**
It’s tempting to stay casual when you’re working from home full-time, but interviewers and candidates should both make the effort to look professional.

You are not legally required to rehire laid off workers, but there are advantages to rehiring your former employees:

**Your former employees already know the job:** You have already invested in their training, ensuring they have the required skills. You are familiar with how they work and how they fit into your company’s culture.

**It’s good for the overall morale of your company:** Staff members have formed relationships, which are broken when they lose a colleague. The team is made whole again when a worker is rehired.

**It can save you money:** Don’t forget to take advantage of the HIRE Act, which gives you tax benefits for hiring a worker who is on unemployment.
AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires some contact with customers.

EMPLOYEE + CUSTOMER PROTECTION

- Masks should be used for employees working in close proximity.
- Smaller farms can participate in socially-distant farmer’s markets to safely provide products for customers.
- Use social distancing when preparing products for delivery/making deliveries.
  - Social distancing should be used at the farm for employees, too.

RECOMMENDED EQUIPMENT LIST

- Basic cloth face mask or higher grade.
- Non-surgical gloves.
- Hand sanitizer.
- Professional cleaning products.

MORE AGRICULTURE RESOURCES

Texas Department of Agriculture: www.texasagriculture.gov
Texas Farm Bureau: www.texasfarmbureau.org/covid-19-resources
ANIMAL SERVICES

This includes veterinary offices, animal shelters and groomers.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires some contact with customers.

EMPLOYEE + CUSTOMER PROTECTION

- Masks should be used for employees working in close proximity.
- If a customer or employee is sick, he or she will be sent home or to a healthcare facility.
- At veterinary offices and groomers, owners should drop off their pets curbside while they receive services. Owners will wait for their pets in the car.
- Animal shelters should use virtual tours when possible and limit visits to appointment only. Only one customer should visit at a time.
- Limit cash handling.
- Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
- Sanitize point of sale equipment after each use, including pens.
- Provide hand sanitizer and disinfectant wipes at register locations.

RECOMMENDED EQUIPMENT LIST

- Basic cloth face mask or higher grade.
- Plexiglass/clear barrier at point of sale, if applicable.
- Floor markings near point of sale to encourage social distancing, if applicable.
- Surgical gloves.
- Hand sanitizer.
- Professional cleaning products.

MORE ANIMAL SERVICES RESOURCES

Texas State Board of Veterinary Medical Examiners: www.veterinary.texas.gov
CHILD CARE FACILITIES

This section includes family child care programs, also known as home-based child care, Pre-K (Pre-kindergarten) programs at private and public schools, Head Start and Early Head Start programs. This also includes private child care centers, temporary child care centers operated by municipalities for the children of essential service providers, such as first responders, healthcare workers, transit workers, and other industries where a parent cannot stay home and child care centers that partner with healthcare facilities to support healthcare workers in need of child care.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires direct physical contact with children.

EMPLOYEE + CHILD PROTECTION

• When feasible, staff members and older children should wear face coverings within the facility. Cloth face coverings should NOT be put on babies and children under age two because of the danger of suffocation.

• Employees who have a fever or are otherwise exhibiting COVID-19 symptoms will not be allowed to work.
• Persons who have a fever of 100.4°F (38.0°C) or above or other signs of illness should not be admitted to the facility. Encourage parents to be on the alert for signs of illness in their children and to keep them home when they are sick. Screen children upon arrival, if possible.
• Encourage workers to report any safety and health concerns to the employer.

• Facilities should develop a schedule for cleaning and disinfecting.
• Routinely clean, sanitize, and disinfect surfaces and objects that are frequently touched, especially toys and games. This may also include cleaning objects/surfaces not ordinarily cleaned daily such as doorknobs, light switches, classroom sink handles, countertops, nap pads, toilet training potties, desks, chairs, cubbies, and playground structures. Use the cleaners typically used at your facility.
• Use all cleaning products according to the directions on the label. For disinfection, most common EPA-registered, fragrance-free household disinfectants should be effective.
• If possible, provide EPA-registered disposable wipes to child care providers and other staff members so that commonly used surfaces such as keyboards, desks, and remote controls can be wiped down before use.
• All cleaning materials should be kept secure and out of reach of children.
• Cleaning products should not be used near children, and staff should ensure that there is adequate ventilation when using these products to prevent children from inhaling toxic fumes.
• Toys that cannot be cleaned and sanitized should not be used.
• Machine washable cloth toys should be used by one individual at a time or should not be used at all. These toys should be laundered before being used by another child.
• Do not share toys with other groups of infants or toddlers, unless they are washed and sanitized before being moved from one group to the other.
• Bedding that touches a child’s skin should be cleaned weekly or before use by another child.
Consider staggering arrival and drop off times and plan to limit direct contact with parents as much as possible.

- Ideally, the same parent or designated person should drop off and pick up the child every day. If possible, older people such as grandparents or those with serious underlying medical conditions should not pick up children, because they are more at risk for severe illness from COVID-19.
- Hand hygiene stations should be set up at the entrance of the facility, so that children can clean their hands before they enter.
- If possible, child care classes should include the same group each day, and the same child care providers should remain with the same group each day.
- Cancel or postpone special events such as festivals, holiday events, and special performances.
- Limit the mixing of children, staggering playground times and keeping groups separate for special activities such as art, music, and exercising.
- If possible, at nap time, ensure that children’s naptime mats (or cribs) are spaced out as much as possible, ideally 6 feet apart. Consider placing children head to toe in order to further reduce the potential for viral spread.
- If possible, arrange for administrative staff to telework from their homes.

It is important to comfort crying, sad, and/or anxious infants and toddlers, and they often need to be held. To the extent possible, when washing, feeding, or holding very young children: Child care providers can protect themselves by wearing an over-large button-down, long sleeved shirt and by wearing long hair up off the collar in a ponytail or other updo.

- Child care providers should wash their hands, neck, and anywhere touched by a child’s secretions.
- Child care providers should change the child’s clothes if secretions are on the child’s clothes. They should change the button-down shirt, if there are secretions on it, and wash their hands again.
- Contaminated clothes should be placed in a plastic bag or washed in a washing machine.
- Child care providers should wash their hands before and after handling infant bottles prepared at home or prepared in the facility. Bottles, bottle caps, nipples, and other equipment used for bottle-feeding should be thoroughly cleaned after each use by washing in a dishwasher or by washing with a bottlebrush, soap, and water.

- If a cafeteria or group dining room is typically used, serve meals in classrooms instead. If meals are typically served family-style, plate each child’s meal to serve it so that multiple children are not using the same serving utensils.
- Food preparation should not be done by the same staff who diaper children.
- Sinks used for food preparation should not be used for any other purposes.
- Caregivers should ensure children wash hands prior to and immediately after eating.
- Caregivers should wash their hands before preparing food and after helping children to eat.

When diapering a child, wash your hands and wash the child’s hands before you begin, and wear gloves. Follow safe diaper changing procedures. Procedures should be posted in all diaper changing areas. Steps include:

- Prepare (includes putting on gloves)
- Clean the child
- Remove trash (soiled diaper and wipes)
- Replace diaper
- Wash child’s hands
- Clean up diapering station
- Wash hands

- After diapering, wash your hands (even if you were wearing gloves) and disinfect the diapering area with a fragrance-free bleach that is EPA-registered as a sanitizing or disinfecting solution. If other products are used for sanitizing or disinfecting, they should also be fragrance-free and EPA-registered. If the surface is dirty, it should be cleaned with detergent or soap and water prior to disinfection.
CHILD HEALTH SCREENING OPTIONS

OPTION 1: RELIANCE ON SOCIAL DISTANCING
Ask parents/guardians to take their child's temperature either before coming to the facility or upon arrival at the facility.
Upon their arrival, stand at least 6 feet away from the parent/guardian and child. Ask the parent/guardian to confirm that the child does not have fever, shortness of breath or cough.
Make a visual inspection of the child for signs of illness which could include flushed cheeks, rapid breathing or difficulty breathing (without recent physical activity), fatigue, or extreme fussiness.
You do not need to wear personal protective equipment (PPE) if you can maintain a distance of 6 feet.

OPTION 2: RELIANCE ON BARRIER/PARTITION CONTROLS
Stand behind a physical barrier, such as a glass or plastic window or partition that can serve to protect the staff member’s face and mucous membranes from respiratory droplets that may be produced if the child being screened sneezes, coughs, or talks.
Make a visual inspection of the child for signs of illness, which could include flushed cheeks, rapid breathing or difficulty breathing (without recent physical activity), fatigue, or extreme fussiness.
- Conduct temperature screening (follow steps below)
- Perform hand hygiene

Wash your hands with soap and water for 20 seconds. If soap and water are not available, use a hand sanitizer with at least 60% alcohol. Put on disposable gloves. Check the child's temperature, reaching around the partition or through the window. Make sure your face stays behind the barrier at all times during the screening.
If performing a temperature check on multiple individuals, ensure that you use a clean pair of gloves for each child and that the thermometer has been thoroughly cleaned in between each check.
If you use disposable or non-contact (temporal) thermometers and you did not have physical contact with the child, you do not need to change gloves before the next check. If you use non-contact thermometers, clean them with an alcohol wipe (or isopropyl alcohol on a cotton swab) between each client. You can reuse the same wipe as long as it remains wet.

OPTION 3: RELIANCE ON PERSONAL PROTECTIVE EQUIPMENT
If social distancing or barrier/partition controls cannot be implemented during screening, personal protective equipment (PPE) can be used when within 6 feet of a child. However, reliance on PPE alone is a less effective control and more difficult to implement, given PPE shortages and training requirements.
Upon arrival, wash your hands and put on a facemask, eye protection (goggles or disposable face shield that fully covers the front and sides of the face), and a single pair of disposable gloves. A gown could be considered if extensive contact with a child is anticipated.
Wash your hands with soap and water for 20 seconds. If soap and water are not available, use a hand sanitizer with at least 60% alcohol. Put on disposable gloves. Check the child’s temperature, reaching around the partition or through the window. Make sure your face stays behind the barrier at all times during the screening.
Make a visual inspection of the child for signs of illness, which could include flushed cheeks, rapid breathing or difficulty breathing (without recent physical activity), fatigue, or extreme fussiness, and confirm that the child is not experiencing coughing or shortness of breath.
OPTION 3: CONTINUED

Take the child’s temperature. If performing a temperature check on multiple individuals, ensure that you use a clean pair of gloves for each child and that the thermometer has been thoroughly cleaned in between each check. If you use disposable or non-contact (temporal) thermometers and did not have physical contact with an individual, you do not need to change gloves before the next check. If you use non-contact thermometers, clean them with an alcohol wipe (or isopropyl alcohol on a cotton swab) between each client. You can reuse the same wipe as long as it remains wet.

After each screening, remove and discard PPE, and wash hands. Use an alcohol-based hand sanitizer that contains at least 60% alcohol or wash hands with soap and water for at least 20 seconds. If hands are visibly soiled, soap and water should be used before using alcohol-based hand sanitizer.

If your staff does not have experience in using PPE, check to see if your facility has guidance on PPE. The procedure to take on and off PPE should be tailored to the specific type of PPE that you have available at your facility. You can also review PPE use in this booklet.

RECOMMENDED EQUIPMENT LIST

- Basic cloth face mask or higher grade. A higher grade, such as a surgical mask, could be advised for employees who provide health screenings for children.
- Signage and markings to encourage distancing at drop-off and pick-up times.
- Non-surgical gloves.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
- Touchless thermometer.

CLOSE CONTACT SERVICES:
WAXING SALONS| TATTOO FACILITIES| MASSAGE THERAPY

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires direct physical contact with customer.

EMPLOYEE + CUSTOMER PROTECTION

- Use all disposable materials & supplies according to public health rules.
- All employees will wear facemasks and gloves. One facemask can be used per day. Gloves will be disposed of and changed after each client.
- Employees should wear a disposable lab-coat or protective gown.
- Services should be provided by appointment only -- no walk-in customers.
- If social distancing can't be maintained, customers will wait in their vehicles until the service provider is ready.
- Add the following questions to your consent form: Have you been exposed? Have you traveled recently? Have you had a fever?
- All equipment, chairs, and tables used by an employee should be sanitized between clients.
- Provide hand sanitizer/sanitization wipes to customers upon arrival.
- Employees should have temperature taken upon beginning each workday.
- Post a sign outside the front door/window that states that any customer who has a fever or other COVID-19 symptoms must reschedule their appointment.
- No books/magazines will be provided to customers.
- Only one person should be admitted to each service room at any time.
- Only one client per service provider.
- Limit cash handling.
- Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
- Sanitize point of sale equipment after each use, including pens.

RECOMMENDED EQUIPMENT LIST

- Surgical mask or higher grade.
- Face shield/goggles.
- Plexiglass barrier at point of sale, if applicable.
- Floor markings near point of sale to encourage social distancing, if applicable.
- Non-surgical gloves.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

- Plexiglass/clear barrier at point of sale.
- Floor markings near point of sale to encourage social distancing, if applicable.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
CLOSE CONTACT SERVICES: TANNING SALONS

AVERAGE LEVEL OF CUSTOMER INTERACTION

Very minimal customer interaction.

EMPLOYEE + CUSTOMER PROTECTION

- Avoid using other employees' phones, desks, keyboards, etc. and disinfect them before and after use.
- All employees will wear facemasks and gloves. One facemask can be used per day. Gloves will be disposed of and changed after each client.
  - Employees who display symptoms of COVID-19 will be sent home.
- Services will be provided by appointment only—no walk-in customers.
  - No one should be allowed to wait in the store; customers will wait in their vehicles until the service provider is ready.
- Retrain employees in proper hygiene practices.
  - Recommend alcohol and gel-based hand sanitizers in salons for employees.
  - No employees with COVID-19 symptoms will provide services to clients.
  - Provide workers and customers with tissues and trash receptacles.
  - Post a sign at the entrance and eye-level at each workstation stating that any customer who has a fever or exhibits symptoms of COVID-19 must reschedule their appointment.
  - No books/magazines will be provided to customers.
  - Sanitize all tanning equipment and client contact surfaces with our EPA-hospital-grade disinfectant.
  - Use laundry machines according to the manufacturer’s instructions. Use warmest appropriate water settings and dry items completely.
- Limit the number of people in the building (only those receiving service and service providers allowed in the building).
  - Clearly mark six feet distances in lines at cash registers and in other high-traffic areas.
- Limit cash handling.
  - Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
  - Sanitize point of sale equipment after each use, including pens.

RECOMMENDED EQUIPMENT LIST

- Basic cloth mask or higher grade.
- Plexiglass/clear barrier at point of sale.
- Floor markings near point of sale to encourage social distancing, if applicable.
- Non-surgical gloves.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
CONSTRUCTION

This includes residential, commercial and industrial construction.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires face-to-face interactions and some work in close quarters.

EMPLOYEE + CUSTOMER PROTECTION

- Masks should be used for employees working in close proximity.
- Field fever tests should be administered before employees allowed to enter an active construction site.
- All equipment, materials and tools will be sanitized at the beginning of the workday and upon delivery by a third party.
- Provide required hand-washing stations.

RECOMMENDED EQUIPMENT LIST

- Basic cloth mask or higher grade, unless an employee is working with materials that requires a high-grade mask, such as N95. This follows normal procedure pre-COVID-19.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

Association of General Contractors: https://www.agcaustin.org/covid-19-updates.html
Texas Construction Association: https://www.texcon.org
ENTERTAINMENT VENUES

This section includes facilities such as bingo halls and arcades.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires limited customer interaction.

EMPLOYEE + CUSTOMER PROTECTION

- Staff will be educated and trained on the appropriate use and disposal of personal protective equipment (PPE) and will have appropriate PPE available to them.
- Gloves and masks may be required, and usage could vary based on the level of interaction with customers, namely the touching of physical bingo cards and/or cash.
  - If a customer or employee is sick, he or she will be sent home or to a healthcare facility.
- Limit the number of customers in the venue to better utilize best practices for social distancing (25% capacity).
- Stagger machines (i.e. turning off every other machine in order to keep a 6-foot distance between patrons).
  - Customers will be barred entrance once the safe social distancing capacity has been reached.
  - Limit capacity for food service seating to employ 6-foot distance between patrons.
  - Barriers may be needed in some areas. Specifically, barriers could be used at bingo card purchasing stations, wager windows or stations and food service areas.
- Additional hand sanitizing stations will be available to patrons and employees.
- Any equipment used will be cleaned and disinfected after each use.
- Bathrooms should be sanitized after use.
- Sanitize any high-traffic areas, such as doorknobs, counters, etc.
  - Follow restaurant guidelines for food service areas.
- Limit cash handling.
  - Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
  - Sanitize point of sale equipment after each use, including pens.

RECOMMENDED EQUIPMENT LIST

- Basic cloth mask or higher grade.
- Plexiglass barrier at point of sale.
- Floor markings near point of sale or high-traffic areas to encourage social distancing.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

ENTERTAINMENT VENUES: MOVIE THEATERS

This section includes movie theaters. Other theaters hosting concerts, performers, etc. can also follow these guidelines, but may prefer to open when events can be filled at capacity.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires limited customer interaction.

EMPLOYEE + CUSTOMER PROTECTION

• Staff will be educated and trained on the appropriate use and disposal of personal protective equipment (PPE) and will have appropriate PPE available to them.
• Gloves and masks may be required, and usage could vary based on the level of interaction with customers.
• If a customer or employee is sick, he or she will be sent home or to a healthcare facility.
• Limit the number of customers in the venue to better utilize best practices for social distancing (25% capacity). This rule applies per movie screen, too.
• Stagger payment areas and tables in food service areas.
• Customers will be barred entrance once the safe social distancing capacity has been reached.
• Space between customers in food service and retail areas, as well as the ticket booth, will be set at the recommended 6 feet.
• Direct customers to seats that separate them from other customers by 6 feet.
• Additional hand sanitizing stations will be available to patrons and employees.
• Any equipment used will be cleaned and disinfected after each use.
• Bathrooms should be sanitized after use.
• Sanitize any high-traffic areas, such as doorknobs, counters, etc.
• Follow restaurant guidelines for food service areas.
• Sanitize theater seats following each movie. If this isn’t possible, install disposable material on seats and discard after each movie.
• Limit cash handling.
• Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
• Sanitize point of sale equipment after each use, including pens.
• Encourage use of kiosks to pay and sanitize them frequently.

RECOMMENDED EQUIPMENT LIST

• Basic cloth mask or higher grade.
• Plexiglass/clear barrier at point of sale.
• Floor markings near point of sale or high-traffic areas to encourage social distancing.
• Markings/signage to encourage staggering of theatre seats.
• Disinfectant wipes.
• Hand sanitizer.
• Professional cleaning products.
EXERCISE FACILITIES

This section includes gyms, fitness centers and studios.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires limited customer interaction.

EMPLOYEE + CUSTOMER PROTECTION

- Employees and customers should be encouraged to wear PPE where applicable. Do not use PPE if it affects breathing while exercising.
- If a customer or employee is sick, he or she will be sent home or to a healthcare facility.
- Gyms are allowed to open at 25% capacity
- Some locations may require barriers to separate customers and/or employees.
- Stagger/spread equipment to maintain a distance of 6 feet between machines.
- Customers will be barred entrance once the safe social distancing capacity has been reached.
- Space between customers in food service and retail areas will be set at the recommended 6 feet.
- It may also be necessary to set the same requirement in high-traffic exhibit areas.
- Additional hand sanitizing stations will be available to patrons and employees.
- Employees should perform regular cleaning and encourage customer assistance with cleaning equipment after each use.
- Bathrooms should be sanitized after use.
- Sanitize any high-traffic areas, such as doorknobs, counters, etc.
- No food products consumed on premise by employees or customers.
- Customers and employees should bring their own water or other drinks.
- No towels should be offered by the gym. Customers should bring their own towels.
- Limit cash handling.
- Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
- Sanitize point of sale equipment after each use, including pens.

RECOMMENDED EQUIPMENT LIST

- Basic cloth mask or higher grade.
- Plexiglass/clear barrier at point of sale.
- Floor markings near point of sale or high-traffic areas to encourage social distancing.
- Markings/signage to encourage staggering of machines.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
- Non-surgical gloves.

MORE EXERCISE RESOURCES

Association of Fitness Studios: https://member.afsfitness.com/
FINANCIAL SERVICES

This includes banks, credit unions and financial planners.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires some contact with customers and cash handling.

EMPLOYEE + CUSTOMER PROTECTION

- Masks should be used for employees working in close proximity to other employees or customers.
- Employees handling cash should wear gloves.
- Limit the number of individuals inside the lobby/public areas.
- Encourage drive-thru use.
- Encourage virtual meetings regarding loans, financial planning, etc.
- Additional hand sanitizing stations will be available to patrons and employees.
- Bathrooms should be sanitized after use.
- Sanitize any high-traffic areas, such as doorknobs, counters, etc.
- Point of sale equipment will be frequently cleaned and sanitized.
- Protective screens may be installed at the discretion of each institution.
- Teller windows must be at least 6 feet apart.
- Pens should be sanitized after use.
- Plexiglass/clear barriers add extra protection at teller windows if lobby remains open.

RECOMMENDED EQUIPMENT LIST

- Basic cloth mask or higher grade.
- Plexiglass/clear barrier at teller stations.
- Floor markings near point of sale or high-traffic areas to encourage social distancing.
- Non-surgical gloves.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

MORE FINANCIAL SERVICES RESOURCES

Texas Bankers Association: https://www.texasbankers.com/
Union National Association: https://www.cuna.org/
Financial Planning Association: https://www.onefpa.org/
This section includes restaurants, bars, coffee shops and catering companies.

**AVERAGE LEVEL OF CUSTOMER INTERACTION**

Work requires some contact with customer.

**EMPLOYEE + CUSTOMER PROTECTION**

- Employees are required to wear masks.
- Gloves are already part of the supplies restaurants use on a daily basis. There should be no additional need for other supplies outside the normal course of business.
- Dining areas are allowed to open at 25% capacity
- Staff will limit the number of customers in the restaurant to those that can be adequately distanced 6 feet apart.
- Any indoor or outdoor waiting area must be marked so that social distancing standards are met. One member of a party may be allowed in waiting area while other members of their party wait in their car.
  - Tables will be limited to no more than 6 guests per table.
  - Tables/booths may alternatively be separated by a physical barrier.
- Tables and seating will be sanitized after each guest.
- Bathrooms should be sanitized frequently.
- High customer contact areas (e.g. door entrances) should be cleaned every two hours.
- Menus, if laminated, should be cleaned after each usage, or paper menus shall be designed for single use.
  - Condiments are not to be left on tables. Provide by request and sanitize after usage, or disposable packets should be used.
  - Employees are encouraged to take ServSafe Food Handler class to learn more about food safety as it relates to COVID-19.
- Wash your hands often with soap and water for at least 20 seconds.
  - If soap and water are not available, use a 60% alcohol-based hand sanitizer per CDC.
  - Avoid touching your eyes, nose, and mouth with unwashed hands.
- Employees who have a fever or other symptoms of COVID-19 will not be allowed to work.
  - A sign should be posted on the store that individuals who have a fever, cough or any sign of sickness should not enter.
- Never touch Ready-to-Eat foods with bare hands.
  - Use single service gloves, deli tissue, or suitable utensils.
  - Wrap food containers to prevent cross contamination.
  - Follow 4 steps to food safety: Clean, Separate, Cook, and Chill.
PICK-UP + DELIVERY

- If offering delivery options:
  - Ensure coolers and transport containers are cleaned and sanitized
  - Maintain time and temperature controls
  - Avoid cross contamination; for example, wrap food before transport
- Encourage customers to use no-touch deliveries
- Notify customers as the delivery is arriving by text message or phone call
- Establish designated pick-up zones for customers
- Offer curb-side pick-up
- Practice social distancing by offering to place orders in vehicle trunks

CREATING A BARRIER

You can practice social distancing in your restaurant by moving tables to ensure they are six feet apart. If your establishment has booths, you can install a 24-inch-tall barrier between booths to maintain social distancing.

24-inch-tall barrier attached to booths maintains social distancing without losing booth space. This can be made of plastic, plexi glass, etc. as long as it’s solid.

RECOMMENDED EQUIPMENT LIST

- Basic cloth mask or higher grade.
- Plexiglass/clear barrier at point of sale.
- Barrier between booths, if applicable.
- Floor markings near point of sale or high-traffic areas to encourage social distancing.
- Gloves for employees handling cash. Gloves are already used in food preparation.
- Non-surgical gloves.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

MORE FOOD SERVICE RESOURCES

National Restaurant Association: https://restaurant.org/
CDC: https://www.cdc.gov/
Texas Restaurant Association: https://www.txrestaurant.org/
MANUFACTURING

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires some contact with other employees.

EMPLOYEE + CUSTOMER PROTECTION

- Establish an adequate supply of PPE. This includes:
  - Disposable surgical masks (1 per employee/day).
  - Nitrile gloves (2 pairs per employee/day).
  - Glasses/face-shields (1 per employee).

- Establish a social distancing strategy based on the layout and workflow of the facility, including break areas.

- Arrange staggered “day-of-return” meetings to discuss mitigation strategy.

- Limit face-to-face interaction with customers.

- Barriers or screens may be installed in areas where workflow prohibits adherence to social distancing protocol.

- Establish on-site health screening strategy.

- Establish on-site screening checkpoints upon entrance to facility.

- Establish isolation protocols in case an employee contracts COVID-19 and contaminates the facility.

- Establish an adequate supply of preventative material inventory (soap, sanitizer, thermometers, etc.).

- Establish a disinfection team to clean/disinfect entire facility and create a recurring disinfection schedule.

- Establish an inbound parts/materials/packages disinfection strategy.

- Expedited shipments (transit time less than 48 hours) should be handled utilizing PPE and personal sanitation practices.

- Expedited shipment may be sanitized (only by appropriately trained personnel) with a 10% bleach solution or a hospital grade disinfectant.

- When possible, allow incoming materials to remain untouched for 48 hours when received.

- Establish an internal pandemic response team who will design and implement a “return-to-work” plan.

- Assign a COVID-19 protocol coordinator and training strategy.

RECOMMENDED EQUIPMENT LIST

- Cloth mask or higher grade, depending on materials employee works with in the plant.

- Floor markings/signage for high-traffic areas to encourage social distancing.

- Barriers in break rooms/public areas as needed.

- Disinfectant wipes.

- Hand sanitizer.

- Professional cleaning products.

MORE MANUFACTURING RESOURCES

Austin Regional Manufacturers Association: http://arma-tx.org/COVID19-resources
MEDICAL SERVICES: GENERAL

This section includes medical doctor’s offices, urgent care facilities, chiropractic clinics and physical therapy offices.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Physicians, allied health professionals and staff members interact with multiple patients each day, and patients interact with multiple staff members during each encounter.

EMPLOYEE + PATIENT PROTECTION

• Staff will be educated and trained on the appropriate use and disposal of personal protective equipment (PPE) and will have appropriate PPE available to them.
• All employees will wear facemasks and gloves. One facemask can be used per day. Gloves will be disposed of and changed after each client.
• Patients will be encouraged to wear facemasks.
• All staff will be screened for symptoms of COVID-19 including the taking of temperatures each day upon arrival at the facility. Any staff with any signs or symptoms will be immediately sent home or referred to the appropriate health care facility.
• Patients will be screened upon arrival and those who are ill or possibly with symptoms of COVID-19 will be referred to the appropriate healthcare facility.
• Patients will be required to wait in their vehicles and will be notified via cell phone when an exam room is available. They will be escorted directly to the exam room.
• Persons accompanying patients will be required to wait in the car. Exceptions include a parent/guardian when a child is the patient and caregivers for elderly patients or patients with disabilities.
• Routine follow ups on stable conditions and the reporting of test results will be done via telemedicine or the patient portal.
• When possible, non-emergent conditions will be handled via telemedicine.
• When possible, some encounters may be completed in the parking lot to avoid the patient entering the office building.
• High-risk patients will use a separate entrance and exit.
• Office and exam rooms will be cleaned and disinfected between patients.
• Any equipment used will be cleaned and disinfected after each use.
• No books/magazines will be provided to patients.
• Bathrooms should be sanitized after use.
• Sanitize any high-traffic areas, such as doorknobs, counters, etc.
• Staff at checkout will be required to wear gloves.
• Credit card receipts will be emailed or mailed to the patient; no exchange of paper between staff and patient will take place.
• Sanitize point of sale equipment after each use, including pens.
• Protective shields can also be installed at point of sale areas for added safety.

RECOMMENDED EQUIPMENT LIST

• Surgical mask or higher grade for employees working with well patients. N95 masks or higher grade should be used for employees performing health screenings and working with sick patients. Basic cloth mask or higher grade for non-medical employees who do not work with patients.
• Gowns, shoe covers, scrub caps and gloves. Goggles and/or face shields may also be needed.
• Plexiglass/clear barrier at point of sale/reception desk.
• Disinfectant wipes.
• Hand sanitizer.
• Professional cleaning products.
This section includes maxillofacial & oral surgery offices and dentist offices.

**AVERAGE LEVEL OF CUSTOMER INTERACTION**

Doctors, nurses, hygienists and support staff have close physical contact with patients.

**EMPLOYEE + PATIENT PROTECTION**

- Employees will wear masks, gloves, full face shields and/or protective eyewear, shoe covers and disposal gowns. One mask can be used per day. As N95 masks are again available to dentists commercially, they may be used as an option when high aerosolization is anticipated.
- Gloves, shoe covers and gowns will be disposed of after each patient.
- All staff will be screened for symptoms of Covid-19 including the taking of temperatures each day upon arrival at the facility. Any staff with any signs or symptoms will be immediately sent home or referred to the appropriate health care facility.
- Patients will be screened upon arrival and those who are ill or possibly with symptoms of Covid-19 will be referred to the appropriate healthcare facility.
- Patients will be required to wait in their vehicles and will be notified via cell phone when an exam room is available. They will be escorted directly to the exam room.
- Persons accompanying patients will be required to wait in the car. Exceptions include a parent/guardian when a child is the patient and caregivers for elderly patients or patients with disabilities.
- Routine follow ups on stable conditions and the reporting of test results will be done via telemedicine or the patient portal.
- When possible, non-emergent conditions will be handled via telemedicine.
- Services will be provided by appointment. If a walkup patient arrives, that patient will be evaluated in the same manner as an appointed patient, provided that the schedule allows for the extra patient.
- High-risk patients will use a separate entrance and exit. Patients will be separated from each other at all times by at least 6 feet.
- Office and exam rooms will be cleaned and disinfected between patients.
- All instruments will be either disposed or sterilized in an autoclave after each use. Each instrument is individually sterilized and packaged for each patient.
- Chairs, trays, caps and face shields will be cleaned and sanitized after each patient is treated.
- No books/magazines will be provided to patients.
- Bathrooms should be sanitized after use.
- Sanitize any high-traffic areas, such as doorknobs, counters, etc.
- Offices should utilize powered air-purifying respirators with high-efficiency particulate arrestance (HEPA) filters.
- Staff at checkout will be required to wear gloves.
- Credit card receipts will be emailed or mailed to the patient; no exchange of paper between staff and patient will take place.
- Sanitize point of sale equipment after each use, including pens.
- Protective shields can also be installed at point of sale areas for added safety.

**RECOMMENDED EQUIPMENT LIST**

- Surgical mask or higher grade should be used along with a face shield/goggles. Non-medical employees who do not work with patients may wear basic cloth masks or higher grade.
- Gowns, shoe covers, scrub caps and gloves.
- Plexiglass/clear barrier at point of sale/reception desk.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
MEDICAL SERVICES: OPTOMETRY

This section includes optometry and ophthalmology offices.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Work requires direct physical contact with patients.

EMPLOYEE + PATIENT PROTECTION

- Staff will be educated and trained on the appropriate use and disposal of personal protective equipment (PPE) and will have appropriate PPE available to them.
- All employees will wear facemasks and gloves. One facemask can be used per day. Gloves will be disposed of and changed after each client.
- Patients will be encouraged to wear facemasks.
- All staff will be screened for symptoms of Covid-19 including the taking of temperatures each day upon arrival at the facility. Any staff with any signs or symptoms will be immediately sent home or referred to the appropriate health care facility.
- Patients will be screened upon arrival and those who are ill or possibly with symptoms of Covid-19 will be referred to the appropriate healthcare facility.
- Patients will be required to wait in their vehicles and will be notified via cell phone when an exam room is available. They will be escorted directly to the exam room.
- Persons accompanying patients will be required to wait in the car. Exceptions include a parent/guardian when a child is the patient and caregivers for elderly patients or patients with disabilities.
- Routine follow ups on stable conditions and the reporting of test results will be done via telemedicine or the patient portal.
- When possible, non-emergent conditions will be handled via telemedicine.
- Services will be provided by appointment only. No walk-in patients allowed.
- High-risk patients will use a separate entrance and exit. Patients will be separated from each other at all times by at least 6 feet.
- Optical stations will be separated by at least six (6) feet.
- Limit the number of people in the office to one person per doctor, technician, or optician.
- Office and exam rooms will be cleaned and disinfected between patients.
- Any equipment used will be cleaned and disinfected after each use.
- No books/magazines will be provided to patients.
- Bathrooms should be sanitized after use.
- Sanitize any high-traffic areas, such as doorknobs, counters, etc.
- Staff at checkout will be required to wear gloves.
- Credit card receipts will be emailed or mailed to the patient; no exchange of paper between staff and patient will take place.
- Sanitize point of sale equipment after each use, including pens.
- Protective shields can also be installed at point of sale areas for added safety.

RECOMMENDED EQUIPMENT LIST

- Surgical mask or higher. Non-medical employees not working with patients may wear cloth masks.
- Gowns, shoe covers, scrub caps and gloves.
- Plexiglass/clear barrier at point of sale/reception desk.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
MEDICAL SERVICES: MENTAL HEALTH

This section includes mental health and behavioral therapy offices.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Therapists, social workers and other staff members have minimal contact with patients.

EMPLOYEE + PATIENT PROTECTION

- Provide therapy services to patients via phone call or video conference by appointment.
- Update patients on policies amid COVID-19.
- Allow staff to work from home.

- If an emergency arises, the patient should call 911 or report to their nearest emergency room.

RECOMMENDED EQUIPMENT LIST

- Basic cloth face mask or higher grade.
- Plexiglass/clear barrier at point of sale/reception desk.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

PHARMACIES

AVERAGE LEVEL OF CUSTOMER INTERACTION

Some work requires direct physical contact with customer.

EMPLOYEE + CUSTOMER PROTECTION

• Pharmacy personnel will wear protective facemasks and gloves as appropriate.
• If an employee is sick, he or she will be sent home or to a healthcare facility.
• Utilize plastic shields/screens at check-out and other counters.
• Encourage all prescribers to submit prescription orders via telephone or electronically. The pharmacy should have procedures to avoid handling paper prescriptions.
• Drive through and curbside service should be used for prescription pick up.
• Deliver pharmacy items to patients’ homes where possible.
• Utilize plastic shields/screens at check-out and other counters.
• Widen check-out counters for social distancing.
• Strategies to limit direct contact with customers include:
  - Packaged medication can be placed on a counter for the patient to retrieve.
  - Avoid handling insurance or benefit cards.
  - Avoid touching objects that have been handled by patients.
• Add markings and signs where appropriate to encourage social distancing.
• Provide hand sanitizer on counters for use by customers and have sufficient and easy access to soap and water or hand sanitizer for staff.
• Increase cleaning measures and supplies for the pharmacy area.
• Bathrooms should be sanitized after use.
• Sanitize any high-traffic areas, such as doorknobs, counters, etc.
• Close self-serve blood pressure units.
• Limit cash handling.
• Encourage customers to use credit/debit cards, tap to pay, Venmo, PayPal or another form of contact-less payment.
• Sanitize point of sale equipment after each use, including pens.
• Promote the use of self-serve checkout registers and clean them frequently. Provide hand sanitizer and disinfectant wipes at register locations.

RECOMMENDED EQUIPMENT LIST

• Surgical face mask or higher grade.
• Plexiglass/clear barrier at point of sale.
• Floor markings/signage high-traffic areas to encourage social distancing.
• Surgical gloves.
• Disinfectant wipes.
• Hand sanitizer.
• Professional cleaning products.

RETAIL: GENERAL

This section includes furniture & home furnishings, clothing, shoe stores, clothing accessories, luggage stores, leather goods, department stores, sporting goods stores, book stores, craft stores, music stores and other mercantile stores.

AVERAGE LEVEL OF CUSTOMER INTERACTION

Requires close interaction between staff and customers, but not direct physical contact.

RECOMMENDED EMPLOYEE + CUSTOMER PROTECTION

- Post a sign to the storefront that informs individuals who have a fever or other symptoms of COVID-19 should not enter the store.
- Employees may be allowed to wear facemasks or gloves.
- Customers will be encouraged to wear facemasks in order prevent spreading of the virus.
- **Limit the number of individuals inside the store to 25% capacity**
  - All persons in the store should practice social distancing of at least 6 feet between another person.
  - Signs and floor markings can be used to encourage social distancing.
  - Avoid displays that lead to crowding.
- Encourage customers to use hand sanitizer upon entering the store.
- Sanitize doors. Employees should wear face-masks. Gloves should be worn with certain jobs.
- Employees will have access to hand sanitizer or a place to wash their hands.
- Workers and customers will be provided an adequate number of trash receptacles
  - It's recommended to sanitize incoming stock and merchandise.
- Point of sale equipment will be frequently cleaned and sanitized.
- The stores will encourage customers to make non-cash payments.
- Protective screens are recommend at the check-out.
- Sales registers must be at least 6 feet apart.
  - Salesperson will encourage customers; either to insert payment card or to provide their own pen or sanitize store's pen before and after use to sign the receipt. Receipt should be left on counter.
- Employees who have a fever or exhibit COVID-19 symptoms will not be allowed to work.
- Employees will be required to take reasonable steps to comply with guidelines on sanitation from the Centers for Disease Control.
- Encourage workers to report any safety and health concerns to the employer.

RECOMMENDED EQUIPMENT LIST

- Basic cloth face mask or higher grade.
- Plexiglass barrier at point of sale/reception desk or signage/markings to encourage distancing.
- Signage/markings in high-traffic areas to encourage distancing.
- Non-surgical gloves for employees handling cash.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
This section includes grocery stores, liquor stores, food retailers, gas stations and convenience stores.

### AVERAGE LEVEL OF CUSTOMER INTERACTION

Requires close interaction between staff and customers, but not direct physical contact.

### EMPLOYEE + CUSTOMER PROTECTION

- Post a sign to the storefront that informs individuals who have a fever or other symptoms of COVID-19 should not enter the store.
- Employees should wear facemasks. Gloves should only be worn to handle food.
- Customers will be encouraged to wear facemasks in order prevent spreading of the virus.
- Customers should practice sensible social distancing of at least 6 feet between another person.
- Signs and floor markings can be used to encourage social distancing.
- Avoid displays that lead to crowding.
- Encourage guests to make shopping lists to decrease time in store.
- Encourage customers to use hand sanitizer upon entering the store.
- Sanitize doors. Employees should wear facemasks and/or gloves.
- Employees will have access to hand sanitizer or a place to wash their hands.
- Workers and customers will be provided an adequate number of trash receptacles.
- It is recommended to sanitize incoming stock and merchandise.
- Sanitize bathrooms often and limit bathroom occupancy.
- Sanitize shopping carts and baskets often. Encourage customers to wipe down carts before use.

- Point of sale equipment will be frequently cleaned and sanitized.
- The stores will encourage customers to make non-cash payments.
- Add clear shields to point of sale/reception desk or signage/markings to encourage distancing.
- Sales registers must be at least 6 feet apart.
- Salesperson will encourage customers; either to insert payment card or to provide their own pen or sanitize store’s pen before and after use to sign the receipt. Receipt should be left on counter.

- Encourage workers to report any safety and health concerns to the employer.

### RECOMMENDED EQUIPMENT LIST

- Basic cloth face mask or higher grade.
- Plexiglass/clear barrier at point of sale/reception desk or signage/markings to encourage distancing.
- Signage/markings in high-traffic areas to encourage distancing.
- Non-surgical gloves for employees handling cash.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.
RETAIL: JEWELRY

This section covers the jewelry retail industry.

AVERAGE LEVEL OF CUSTOMER INTERACTION

General practice (non-COVID) allows for consistent interaction with customers throughout operating hours.

EMPLOYEE + CUSTOMER PROTECTION

- Showroom and common areas should be sanitized before opening and throughout the day.
- Gloves must be worn by employees to transfer all jewelry and equipment.
- Employees must wash hands before working.

Stores use a combination of equipment that include a steamer, boiler, ultraviolet light, and alcohol or sanitizer to keep jewelry clean and germ free. Because metals and gemstones have individual characteristics and reactions, the jewelers must be allowed to determine the safest way to clean each item of jewelry. Jewelers MUST sanitize jewelry at intake.

- All customers should be asked to clean their hands and put on gloves if necessary. Trying on rings is an exception, but customers should wash their hands before and after.
- Masks will be provided/offered to customers in close proximity situations.

- All persons in the store should practice social distancing of at least 6 feet between another person.
- Signs and floor markings can be used to encourage social distancing.
- Avoid displays that lead to crowding.

RECOMMENDED EQUIPMENT LIST

- Plexiglass/clear barrier at point of sale.
- Signage/markers to encourage distancing.
- Non-surgical gloves.
- Disinfectant wipes.
- Hand sanitizer.
- Professional cleaning products.

CLOSING

We know this situation is difficult. Many of us are going through circumstances we never thought we would experience, from teaching our children at home to filing for unemployment. We will rise above this. We will emerge from this better than we were. We are #PflugervilleStrong.
