Good afternoon,

We have had quite a few people reach out to us regarding sanitization services. COVID-19 seems to be the virus that is bringing awareness to the importance of sanitization of homes, vehicles, and commercial properties. The truth is, COVID-19 is easier to kill than some of the other threats we deal with on a daily basis, such as influenza, norovirus, C.diff, mold spores, bacteria, parvo, certain allergens, etc. With our system, we can eliminate all of these concerns in a short amount of time, at a reasonable price, and in just about any structure. Our products are extremely effective, safe, EPA-approved, and leave no toxic residue.

Customers may choose 1 of 2 options:

Option 1. AUX Vapor Shock - We use a safe, EPA-approved vapor system which slowly fills up the volume of the entire home, sanitizing every nook and cranny. This allows permeation of all areas of the home (including ductwork), eliminating bacteria, viruses, germs, allergens, and spores down to the nanometer, as well as oxidation of any unwanted odors. With this 24-hour treatment option, no people, pets, or plants are allowed re-entry until complete. This method is the most thorough, does not harm personal belongings, and leaves no toxic residue.

Option 2. AUX Liquid Solution (Mist/Fog) - We use a safe, EPA-approved, botanical antimicrobial solution to sanitize the entire home. Our solution has residual capabilities of up to 12 days, meaning the product will not only treat existing threats, it will also provide continuous protective effects. The average home will take 45 minutes to 2 hours to complete, depending on size. Although not required, it is recommended that all people, pets, and plants be removed for treatment, but may return 15-20 minutes upon completion of the job. This method does not harm personal belongings and leaves no toxic residue. This method is also extremely effective against bacteria, viruses, germs, allergens, and spores.

We believe in creating healthier working and living environments by minimizing threats that surround us on a daily basis. Please feel free to contact us.
