Here are some interesting facts about your skin:

- It is the largest organ of your body and accounts for 15% of your body weight
- The skin on your feet is the thickest and the skin on your eyelid is the thinnest
- It renews itself every 28 days (that's why it is never too late to begin taking care of it)
- It constantly sheds dead cells (about 35,000 cells every minute!—nearly 9 lbs/year)
- Your skin is home to more than 1,000 species of bacteria

Wouldn't you agree that you should be as diligent at taking care of it as you would your heart, lungs, liver, etc.? As an Independent Beauty Consultant, I am available to work with you to provide the information you need to take care of your skin. My complimentary services include:

- Skin Care and Makeup Application Tips
