

# General Info

## **Power Loading:** No Power Loading.

Boaters should winch their craft onto boat trailers instead of powering their boat onto the trailer. Boat ramps throughout the state are being badly damaged by boaters who power their boats onto the boat trailer. The strong currents created by the boat's propeller causes severe erosion and wash out at the end of the ramp. This condition, in turn, can also cause damage to boat trailers. The Department of Natural Resources is attempting to repair as many of the damaged ramps as possible, but the best solution to the problem lies with the boater who refrains from this practice.

## **Anti-drunk boating law is in effect!**

Michigan watercraft operators can be convicted of operating while impaired or under the influence of alcohol.

\*Under the new law, the Secretary of State's office must keep a record of boating convictions.

\* Boaters must submit to chemical tests by law enforcement officers upon request.

\* Conviction of drunk boating charges brings stiff penalties:

-Suspension of boating privileges from 6 months to indefinite;

-Fines up to \$5,000;

-Jail sentences up to 5 years; and/or

-Community service up to 90 days.

The information used in this directory is from the Recreational Boating Information System published by the Michigan Department of Natural Resources.
