

# GTPQ CRC Materials Subcommittee Meeting

## Meeting Minutes from October 25, 2018

Present:

Monica Flournoy, GDOT	Tom Hruby, NOVA
Glen Foster, GDOT	Bob Barnes, ECS
Ian Rish, GDOT	Rick Douds, GDOT
Mary Cooley, GDOT	JT Rabun, GDOT
Adebola Adelokun, GDOT	Tom Howell, AMEC
Catherine Armstrong, GDOT	
Moussa Issa, GDOT	

Next meeting: January 17, 2019, 10:00AM, GDOT OMAT Office

Minutes Prepared by: Tom Hruby, Jr., P.E., NOVA Engineering and Environmental, LLC.

### **1. OMAT Fee and Cost Estimate Process**

The edits are on-going and taking into account current and on-going changes to the Soil Survey, BFI, WFI and Pavement document updates as well as the editing of the professional services negotiation's manual. Comments were made from the consultants regarding current examples of requests from procurement regarding ODC back up requiring proposals, contracts and/or guarantees for drilling services, MOT, and on-going requests/discussions regarding geotechnical laboratory cost justifications. In one case specialty subconsultants were requested to estimate their services utilizing the OH, FCCM, profit and man hour estimates rather than being submitted as an ODC to a geotechnical/pavement OMAT cost estimate.

### **2. Pavement Design Manual Update**

Updates to Chapter 10 of the Design Policy manual are complete. A new Pavement Type Selection (PTS) manual has been developed and scheduled to be published on R.O.A.D.S. OMAT plans to have Pavement Evaluation Guidelines and Report Templates drafted by the end of calendar year 2018.

### **3. Revisions to 524.5 Non-destructive Testing of Drilled Caissons**

Revisions were discussed and determined that further edits will be made and resent to the committee for review.

### **4. Discuss other Guideline Updates**

Discussed updates to the Soil Survey and BFI Drilling Guidelines and BFI Report Template. These are being sent to the committee for final review and comments.

**General discussion regarding new/other business:**

- Vibration Monitoring Spec 154, discussed editing this to include crack monitoring only. Also discussed global stability contractor requirements and editing certain requirements. Suggested edits will be provided to the committee for review.

**Next Meeting Date: Proposed January 17, 2019**
