

For individuals who have recovered from COVID-19, donating plasma is a great way to make a difference during this exceptional time. For information about plasma donation opportunities through Grifols in North Carolina, please visit www.grifolsplasma.com/en/endcv19 or call 1-866-END-CV19.

Grifols is a global healthcare company with a major presence in our state. The company is playing a leadership role in the response to COVID-19 by developing a plasma-based antibody treatment for the disease. Through partnerships with the Biomedical Advanced Research and Development Authority, Food and Drug Administration, and National Institutes of Health, Grifols is collecting convalescent plasma from eligible COVID-19 survivors across the country.

Grifols' 13 plasma collection centers in North Carolina are participating in this important effort. Convalescent plasma from donors will be manufactured into a hyper-immune therapy specific to COVID-19 at Grifols' manufacturing facility in Clayton, NC.
