

Webinar: The Nuts and Bolts of Selecting a CRO

August 15th, at 2:00 - 3:00 PM

The clinical trial industry is highly regulated with a complex landscape. Contract Research Organizations (CROs) are a big part of any strategic product development life cycle.

Sponsoring companies of new drugs, devices or biologics may outsource all or part of their clinical research. These service providers or vendors range from niche to full service capabilities, which a sponsor of a clinical trial(s) would need to define and assess. Procurement of the best fit CRO involves a variety of processes and people.

This webinar will evaluate the following:

- Determining internal champions/selection committees
- Strategic Sourcing/Procurement workflow/checklist
- Documentation and Regulations
- Challenges of CRO Outsourcing
- Best Practices to get best value

Please join from your desk on August 15th to explore more when selecting a CRO for your organization.

Reserve your seat: <https://bit.ly/2n0hXu5>.

And if you're unable to attend the live event, register anyway to receive an email announcement when the event recording becomes available for viewing.
