

Your strong voice of the building industry statewide.

As a member of the Greater Orlando Builders Association (GOBA), you're automatically a member of the Florida HBA (State) (FHBA), one of the most powerful trade associations in the state.

With a strong voice for the home building industry statewide, FHBA promotes home ownership and fights legislation that would result in cost increases to the residential buyer. Through its lobbying efforts, GOBA speaks for you in Tallahassee, educating elected officials about the realities of the home building industry, promoting sound, positive legislation, and keeping you informed of new laws and regulations that can critically affect your profitability and the way you do business.

A team of FHBA lobbyists is looking out for you every day the legislature is in session. Whether an issue is about zoning, building codes or running a small business, GOBA works with the FHBA to protect the interests of our industry and our members.

The objectives of the Greater Orlando Builders Association and the Florida HBA are to be proactive in the legislative and regulatory process, make sure lines of communication are open between the industry and government, fight unfair regulation, and help maintain a level playing field so our members can operate their businesses as effectively as possible.

Together, members across FL can speak powerfully to make sure that we have effective representation in Tallahassee.
