

Language List

Our language list contains the languages supported by our call platform. After selecting a language with CyraCom your call routes to the interpreter queue for that language. The availability of interpreters for some less-frequently-used languages may vary, and increased requests for languages help us gauge demand and may influence interpreter staffing changes. In the rare instance when interpreters are currently unavailable for the selected language, your call routes to Client Services for further assistance.

Given that there are roughly 6,500 spoken languages in the world, we can and do regularly add support for new languages based on need. Our proven interpreter management process enables us to add more resources to accommodate future growth. Our goal is not to have a static list of languages but rather to have dynamic support to meet growing and changing language needs of our clients across the United States.
