

Darwin Millard
Partner/Co-Founder
PhytoLogix

Darwin Millard specializes in mechanical and solvent based extraction methodologies for isolating highly volatile terpenophenolic secondary metabolites from botanicals. He has spent the last ten years focusing on the extraction and manufacture of nutraceutical products comprising of phytocannabinoids and other bioactive constituents from the cannabis plant. Currently a partner at PhytoLogix™, he works with clients to design and implement cost-effective built-for-purpose phytocannabinoid processing solutions.

Darwin was a part of the team that developed the Dixie Botanicals brand of hemp-based cannabidiol products and has been active in phytocannabinoid policy development since 2013. He is the former chair of the Hemp Industries Association's Cannabinoid Committee, an associate partner with the Indian Industrial Hemp Association, and currently the Industrial Hemp Liaison for ASTM International's Technical Committee D37 on Cannabis where he is working to define standards for the global cannabis industry.
