

Trey Riddle, Ph.D.
CEO, Sunstrand LLC

Dr. Riddle is the CEO of Sunstrand, the leading supplier of sustainable materials for technical and industrial applications. Sunstrand currently operates the only industrial scale commercial hemp decortication facility in North America capable of producing technical grade fibers.

Dr. Riddle is the former President of the KY Hemp Industries Association and a member of the Hemp Industry Roundtable. He started his career in engineering performing accelerated structural testing on wind turbine blades. Prior to Sunstrand, he founded Gradient Engineering, an engineering services firm focused on polymer composite applications. Dr. Riddle received his BSc and PhD in Mechanical Engineering from Montana State University and Masters from Cornell University.
