Winter Lean Construction Program Series

February 1 (various dates)

AGC MA

This is a certificate program that consists of seven units. Following the completion of all seven units, individuals will have a deep knowledge of both the theory and application of Lean Construction and be able to sit for an exam to earn AGC's Certificate of Management - Lean Construction (CM-LC) credential. **New! Have your CSL? Each Lean unit is 1 hour of continuing education credits for your CSL!**

PROGRAMS

OTI- 7500 – Safety & Health Management Systems

December 11

AGC MA

This one day OSHA course addresses the four core elements of an effective safety and health program (Management Leadership and Employee Involvement, Worksite Analysis, Hazard Prevention and Control, and Safety and Health Training) with strategies & techniques that are critical to each element's proper management. The course is designed for the employer, business owner or manager designated with the responsibility to develop and manage a firm's safety and health program or system. The training is also suitable for employees and employee representatives responsible for improving safety and health in the workplace. Participants come away with an understanding of the benefits of implementing a safety and health management system in the workplace.

OTI – 7505 – Accident-Incident Investigation

December 12

AGC MA

This course covers an introduction to basic incident investigation procedures and describes analysis techniques. Course topics include reasons for conducting incident investigations, employer responsibilities related to workplace incident investigations, and a four step incident investigation procedure. The target audience is the employer, manager, employee or employee representative who is involved in conducting incident and/or near-miss investigations. Upon course completion students will have the basic skills necessary to conduct an effective incident investigation at the workplace.

OTI – 7845 – Recordkeeping Rules

December 13

AGC MA

This course is designed to help employers identify and fulfill their responsibilities for recording certain illnesses and injuries, reporting specific cases to OSHA, posting certain records annually, and submitting records electronically. This course is for employees of companies who have responsibilities under OSHA's revised Recordkeeping Rule 29 CFR 1904. Improve the quality and consistency of injury and illness data, while simplifying the system for your employer using OSHA's recordkeeping rule. The 29 CFR 1904 regulation is designed to improve employee involvement in safety and health, and to protect the privacy of an injured or ill worker.

Demo 201: Abatement – A Look Behind the Plastic

December 13

Pierce Atwood

Picking up where our successful Demo 101 program left off, please join us for an advanced discussion of asbestos abatement and demolition methods and how to implement best practices for field supervision and project managers. Topics will include how to best pre-qualify an abatement contractor, how to establish and manage a proper testing regiment during the work, how to implement and manage safety regulations for both OSHA and the Department of Labor, and finally how to closeout an abatement contractor before the plastic comes down.

Blue Beam Bootcamp – 10 things you didn't know Blue Beam could do.

January 22

AGC MA

BlueBeam BootCamp is back! Brought to you by BlueEdge, this half day training takes students beyond the basics and will demonstrate practical applications, functions and workflows and is geared for those looking to build upon their existing knowledge of Bluebeam software. In this course we will dive deeper into technical solutions and make new discoveries in how to improve team collaboration, enhance project communication and maintain knowledge continuity!
