PROFESSIONAL DEVELOPMENT

OSHA 10-Hour Training
July 16 & 17
AGC MA

The OSHA 10-Hour training course is intended as an orientation to OSHA safety training standards and covers safety and health hazards workers may face on construction work sites. Construction workers working on public construction sites in MA are required to have OSHA 10-Hour Training. This training places special emphasis on hazard identification, avoidance, control, and prevention. Workers who successfully complete OSHA 10-Hour training will earn their OSHA Education Center 10-Hour Card.

OSHA 30-Hour Training
August 20-23
AGC MA

OSHA 30-hour training is the primary method used to train workers and supervisors on hazard recognition and OSHA safety standards. AGC MA bring together highly recognized trainers and safety directors in the construction, legal, insurance, and regulatory industry for this program.
