Digital Horizons is a Brainerd-based technology integration company that specializes in the design, installation, and servicing of audio, video, automation, and security systems for residential and commercial environments. Digital Horizons was founded by myself and Scott Johannes in May of 2013 and we have been fortunate to experience exponential growth since the businesses' inception. Our approach is very simple - we listen more than we talk, we set high standards for ourselves, and we always try to exceed expectations. Aside from Scott and myself, we have two other amazing people on our team; Dustin Christensen (who has been with us for over 2 years) and Andrew Capistrant (who joined us in May), who help execute our installations - we would not be successful without them.

In late 2016 we purchased a warehouse across from the UPS building in the Brainerd Industrial Park and began the remodeling process - today it is now what we call our 'Experience Center'. In it houses three areas that contain the majority of the services and systems that we offer - a Kitchen, Living Room, and Conference room, all with automated lighting control, motorized window treatments, audio systems, HVAC control, surveillance cameras, security systems, custom TV installations, and more. All controlled by voice, too!

One of the first things we did as a business was to join the MMBA. A large part of our business is directly tied

to the building industry, either through our builder, architects, or interior designer partners, or by working directly with a homeowner and the success of the construction industry is vital to us and our community. We look forward to hosting the meeting in September and hope to see you there!

### Deluxe Door Prize:

Attend the GMM, you could be going home with a new TV.
